that explain to a satisfactory degree both the under development of philosophy and history of science in Greece until recently and its recent development to international standards It is perhaps not easy to have in mind the fact that the modern Greek State is only 160 years old during quite a period of which it was considerably smaller than it is today its present territory having been settled after World War II **The New Annual Register, Or General Repository of History, Politics, Arts, Sciences, and Literature, for the Year ...** ,1797 The History of the Study of Landforms Volume 2 R. Structure, Consciousness, and History Richard Harvey Brown,Stanford M. Lyman,1978-08-31 First published in 1978 this volume is addressed to the crisis prevailing in the social and cultural sciences The authors explore the conflict between positivism and romanticism between hard and soft sociological research methods and between objectivity and subjectivity conflicts that were particularly acute in sociology at the time of publication All of the essays adopt the approach of symbolic realism or cognitive aesthetics to overcome the dualism in conventional sociological theory This strategy of symbolic realism is a philosophical amalgam forged from findings in existential phenomenology ordinary language philosophy and pragmatism It establishes a legitimate basis for the application of aesthetic criteria to truth seeking in the social sciences The synthesis emergent from these essays suggests a paradigm with broad implications for all the human studies Students of culture will find this volume a provocative point of departure for their own investigations The History of the Study of Landforms Or The Development of Geomorphology Richard J.
