Madden, 2017-10-03 This book is inspired by Roger E Howe's contributions to the international communities of mathematics and mathematics education. Renowned for his research contributions in the fields of representation theory, automorphic forms, harmonic analysis, and invariant theory, Dr. Howe has also fundamentally deepened our understanding of the mathematics taught in the early school grades and has challenged and stimulated mathematicians and mathematics educators to work together to examine this part of the mathematical universe more critically and in imaginative new ways. This volume will help summarize and highlight Howe's contributions to several topic areas in mathematics education, demonstrating the possibility and importance of engaging mathematicians in high impact research in mathematics education and showcasing the importance of cross disciplinary collaboration and exchange.

Common Core Standards a Step-By-Step Approach: Mathematics - Grades K-5 Toby Karten, 2012-01-01 Excelling at math is no longer simply a matter of getting answers right. Today the Common Core State standards require not only computational fluency but also a deep level of comprehension and critical thinking skills. Common Core Standards A Step by Step Approach Mathematics Grades K-5 guides teachers in implementing instruction that builds the full range of mathematics skills outlined in the Common Core State Standards for Mathematics. Written by Toby Karten, an educator with more than 30 years of experience, this six page tri fold laminated guide clearly identifies that process. **Object Lessons** Caren Holtzman, Lynn Susholtz, 2024-11-15 When Caren Holtzman and Lynn Susholtz look around a classroom they see a veritable goldmine of mathematical investigations involving number, measurement, size, shape, symmetry, ratio, and proportion. They also think of the ways great artists have employed these concepts in their depictions of objects and space. For example, Picasso's use of geometric shapes in his Cubist still lifes or contemporary artist Tara Donovan's room sized sculptures of everyday items. In their new book *Object Lessons*, Caren, a math educator, and Lynn, an artist and art educator, use a highly visual approach to show students and teachers the art in math and the math in art. Integrating visual arts into math experiences makes the lessons accessible, engaging, and meaningful for a wide range of students. In each chapter the authors use everyday objects to create rigorous hands on activities that address key mathematics standards and concepts. Each lesson provides an introduction to the featured object that explains how it connects to key mathematical concepts, a discussion of the artist's art styles and techniques, featured activities organized by grade level and math content area, the basic materials required to prepare and teach each lesson, a clear picture of what the lesson will look like in a classroom, and a list of resources. The book and its accompanying CD feature a wonderful gallery of images including art photos and student work, and a collection of links to art education organizations, museums, and Web sites that focus on the work of forty major
