Power Flame[®] Type JA

**Power Flame's
Versatile Small to Medium
Range Gas Burner**

Totally Enclosed Control Cabinet
Protection with easy access to
operating components for JA
(Optional panel for JRA shown
above)

Mounting Flange Flexibility
Easily adapted to varying firing
head insertion depths

Circular Furnace Opening
No special cutting of combustion
chamber front plate

The Power Flame Type JA gas burner presents optimum, state-of-the-art design for maximum combustion efficiency and operating dependability. These packaged combustion systems will fire natural, L.P. and a full range of waste or other gaseous fuels. The flame retention firing head incorporates a premix combustion zone with stainless steel, multiport diffuser to produce full range stable performance in both positive and negative combustion chambers. The JA burner is capable of firing high pressure drop and confined combustion chamber configurations.

Operating system adjustments have been minimized to provide trouble-free start up and operating performance.

The Type JA produces efficient combustion without the aid of refractory or other costly flame support devices. The integrally mounted control cabinet on the JA (optional on the JRA) provides annunciation features usually found on larger industrial size systems. The modular design produces added flexibility in the choice of optional features. All Power Flame packaged combustion systems are factory fire-tested to ensure cost effective installation and start up.

**Alpha System™ LED Indicators
& Switches**
Operator annunciation is unique
for small to medium size applica-
tions (Light board shown on right
panel section is optional. Annuncia-
tion is an optional feature for JRA
with panel.)

**Multi-Louvered Combustion Air
Damper Assembly**
More accurate control of fuel-air
ratios
