

Biology Chapter 4 Book Notes

Section 1

- Nucleic acids are polymers, just as proteins are polymers
 - But instead of being assembled from amino acids, **nucleic acids** are made up of monomers called **nucleotides**.
- **3 components of a nucleotide:**
 - Phosphate group
 - 5-carbon sugar
 - Nitrogen containing base
 - **The phosphate group is bonded to the sugar molecule, which is bonded to the base**
- The sugar is the central component of the nucleotide
 - The five carbons in this sugar are labeled w/ numbers and prime symbols (') to provide a frame of reference
 - **Ex) the base is attached to the 1' carbon and the phosphate group is attached to the 5' carbon**
- Ribonucleotides are monomers of ribonucleic acid (RNA) and deoxyribonucleotides are the monomers of deoxyribonucleic acid (DNA)
 - Sugars: Ribose in ribonucleotides, deoxyribose in deoxyribonucleotides
 - **Deoxy- lacking in oxygen**
- Ribonucleotides and deoxyribonucleotides also differ in one of their nitrogenous bases
 - These bases belong to structural groups called **purines** and **pyrimidines**
 - Purines: adenine (A) and guanine (G)
 - Pyrimidines: cytosine (C), uracil (U), and thymine (T).
 - **Ribonucleotides use uracil (U), while deoxyribonucleotides use thymine (T).**
- Based on data from Stanley Miller and researchers who followed (**Chapter 2**), most biologists accept the idea that amino acids could have been synthesized early in Earth's history
 - Miller-like laboratory simulations have shown that nitrogenous bases and many different types of sugars, including ribose, can be synthesized readily under conditions that mimic the prebiotic soup
 - What they found was striking—the minerals preferentially bound to ribose, effectively enriching and concentrating ribose on their surface from a pool of diverse sugars
- Nucleotides polymerize via condensation reactions between the hydroxyl on the sugar component of one nucleotide and the phosphate group of another nucleotide
 - The reaction forms a new covalent bond between the nucleotides, and a molecule of water is released.
 - It's called a **phosphodiester linkage**, or a phosphodiester bond

Dr. David Stoop

Power Notes Chapter 4 Biology:

NUREG/CR. U.S. Nuclear Regulatory Commission,1981 **Participation and Power** W. Michele Simmons,2008-01-03
Takes a firsthand look at a case of public participation in environmental policy Nietzsche's Metaphysics of the Will to Power Tsarina Doyle,2018-02-15 Nietzsche's controversial will to power thesis is convincingly rehabilitated in this compelling book Tsarina Doyle presents a fresh interpretation of his account of nature and value which sees him defy the dominant conception of nature in the Enlightenment and overturn Hume's distinction between facts and values Doyle argues that Nietzsche challenges Hume indirectly through critical engagement with Kant's idealism and that in so doing and despite some wrong turns he establishes the possibility of objective value in response to nihilism and the causal efficacy of consciousness as a necessary condition of human autonomy Her book will be important for scholars of Nietzsche's metaphysics and of the history of philosophy and science more generally *Handbook of Molecular and Cellular Methods in Biology and Medicine* Leland J. Cseke,Peter B. Kaufman,Gopi K. Podila,Chung-Jui Tsai,2003-11-24 Since the publication of the best selling Handbook of Molecular and Cellular Methods in Biology and Medicine the field of biology has experienced several milestones Genome sequencing of higher eukaryotes has progressed at an unprecedented speed Starting with baker's yeast *Saccharomyces cerevisiae* organisms sequenced now include human *Homo sapiens* *Change Your Thoughts, Change Your Life* Dr. David Stoop,2018-06-19 Did you know most of our patterns of behavior are set by the time we are six years old No wonder it's so hard to change Dr David Stoop shows readers that the true way to lasting change is in the renewing of our minds which we accomplish when we faithfully read God's Word and meditate on it daily He clearly shows how to move from fear to love from resentment to gratitude from lust to purity from loneliness to connection from idolatry to contentment and from mistrust to trust Anyone eager to find change that lasts will welcome this practical and encouraging message **The Bhagavata Purana** Ravi Gupta,Kenneth Valpey,2013-04-02 The Bhagavata Purana is a versatile Hindu sacred text containing more than 14 000 Sanskrit verses Finding its present form around the tenth century C E the work inspired several major north Indian devotional traditions as well as schools of dance and drama and continues to permeate popular Hindu art and ritual in both India and the diaspora *New Kind of Machine Learning-Cellular Automata Model* Parimal Pal Chaudhuri,Adip Dutta,Somshubhro Pal Choudhury,Dipanwita Roy Chowdhury,Raju Hazari,2025-04-25 This book introduces the CAML model a novel integration of Cellular Automata CA and Machine Learning ML designed to deliver efficient computation with minimal training data and low computing resources CAML operates through two key perspectives one where CA is enhanced by ML to handle complex non linear evolution and another where CA strengthens ML by leveraging linear CA evolution to process linear functions effectively The book focuses on real world applications of CA such as in Computational Biology where CAML models protein chains to predict mutations linked to human diseases using carefully designed CA rule sequences for each amino acid Another significant application is in multi language Sentiment Analysis

where the model analyzes text in five languages Hindi Arabic English Greek and Georgian without relying on pre trained language models CAML uses CA rules for Unicode character modeling offering a transparent interpretable prediction algorithm Overall CAML aims to drive industrial and societal applications of CA with an emphasis on transparent results and efficient hardware design through CA s regular modular and scalable structure *Rethink How You Think* Dr. David Stoop,2014-01-21 Did you know most of our patterns of behavior are set by the time we are six years old No wonder it s so hard to change Even when we re committed to making a change in life it s always an uphill battle But there is a secret to lasting change that God gave us long before modern neuroscience and self help gurus were the norm *Rethink How You Think* is for anyone who has been frustrated by an inability to change habits overcome fears or keep up new healthy patterns of living and thinking Dr David Stoop shows readers that the true way to lasting change is in the renewing of our minds which we accomplish when we faithfully read God s Word and meditate on it daily He clearly shows how to move from fear to love from resentment to gratitude from lust to purity from loneliness to connection from idolatry to contentment and from mistrust to trust Anyone eager to find change that lasts will welcome this practical and encouraging message *Seduced by Science* Steven Goldberg,2000-10 American religion Steven Goldberg claims has fallen into a trap Just at the moment when it has amassed the political strength and won the legal right to participate effectively in public debate it has lost its distinctive voice Instead of speaking of human values goals and limits it speaks in the language of science In the United States science has extraordinary influence and respect American religious leaders seeking prestige for their point of view regularly couch their responses to technological developments or defend their faith in scientific terms They claim for instance that medical studies demonstrate the power of prayer that science validates the Bible including its account of creation and that patenting the genetic code is dangerous because genes are the essence of who we are But when ministers priests and rabbis expound on double blind studies and the genetic causes of behavior they do not elevate religion Goldberg maintains they trivialize it *Seduced by Science* examines how by allowing scientific discourse to set the terms of the debate American religious leaders facilitate religion s move away from its more appropriate and important concerns of values morality and humility Science can tell us a lot about what is but precious little about what ought to be and our religious leaders often miss the chance to add an important voice from a faith based perspective to the public debate that follows scientific advances Discussing the most recent and pressing collisions between science and religion such as the medicinal benefits of prayer the human genome project and cloning Goldberg raises the timely question of what the appropriate role of religion might be in public life today Tackling the legal aspects of religious debate Goldberg suggests ways that religious leaders might confront new scientific developments in a more meaningful fashion **Inside the Gender Jihad** Amina Wadud,2013-10-01 A world renowned professor of Islamic studies Amina Wadud has long been at the forefront of what she calls the gender jihad the struggle for justice for women within the global Islamic community In 2005 she made international headlines when she helped to promote

new traditions by leading the Muslim Friday prayer in New York City provoking a firestorm of media controversy and kindling charges of blasphemy among conservative Muslims worldwide In this provocative book *Inside the Gender Jihad* Wadud brings a wealth of experience from the trenches of the jihad to make a passionate argument for gender inclusiveness in the Muslim world Knitting together scrupulous scholarship with lessons drawn from her own experiences as a woman she explores the array of issues facing Muslim women today including social status education sexuality and leadership A major contribution to the debate on women and Islam Amina Wadud's vision for changing the status of women within Islam is both revolutionary and urgent
