Albrecht, Nils Damaschke, Michael Borys, Cameron Tropea, 2013-04-17 Providing the first comprehensive treatment, this book covers all aspects of the laser Doppler and phase Doppler measurement techniques, including light scattering from small particles, fundamental optics, system design, signal and data processing, tracer particle generation, and applications in single and two-phase flows. The book is intended as both a reference book for more experienced users as well as an instructional book for students. It provides ample material as a basis for a lecture course on the subject and represents one of the most comprehensive treatments of the phase Doppler technique to date. The book will serve as a valuable reference book in any fluid mechanics laboratory where the laser Doppler or phase Doppler techniques are used. This work reflects the authors' long practical experience in the development of the techniques and equipment, as the many examples confirm. Polarization Measurement and Control in Optical Fiber Communication and Sensor Systems X. Steve Yao, Xiaojun (James) Chen, 2022-11-04 Polarization Measurement and Control in Optical Fiber Communication and Sensor Systems. A practical handbook covering polarization measurement and control in optical communication and sensor

systems In Polarization Measurement and Control in Optical Fiber Communication and Sensor Systems the authors deliver a comprehensive exploration of polarization related phenomena as well as the methodologies techniques and devices used to eliminate mitigate or compensate for polarization related problems and impairments The book also discusses polarization related parameter measurement and characterization technologies in optical fibers and fiber optic devices and the utilization of polarization to solve problems or enable new capabilities in communications sensing and measurement systems The authors provide a practical and hands on treatment of the information that engineers scientists and graduate students must grasp to be successful in their everyday work In addition to coverage of topics ranging from the use of polarization analysis to obtain instantaneous spectral information on light sources to the design of novel fiber optic gyroscopes for rotation sensing Polarization Measurement and Control in Optical Fiber Communication and Sensor Systems offers A thorough introduction to polarization in optical fiber studies including a history of polarization in optical fiber communication and sensor systems Comprehensive discussions of the fundamentals of polarization including the effects unique to optical fiber systems as well as extensive coverage Jones and Mueller matrix calculus for polarization analysis In depth treatments of active polarization controlling devices for optical fiber systems including polarization controllers scramblers emulators switches and binary polarization state generators Fulsome explorations of passive polarization management devices including polarizers polarization beam splitters displacers wave plates Faraday rotators and depolarizers Extensive review of polarization measurement techniques and devices including time division amplitude division and wave front division Stokes polarimeters as well as various Mueller matrix polarimeters for PMD PDL and birefringence measurements Premiere of binary polarization state analyzers and binary Mueller matrix polarimeters pioneered by the authors including their applications for highly sensitive PMD PDL and birefringence measurements Comprehensive discussion on distributed polarization analysis techniques developed by the authors including their applications in solving real world problems Detailed descriptions of high accuracy polarimetric fiber optic electric current and magnetic field sensors Perfect for professional engineers scientists and graduate students studying fiber optics Polarization Measurement and Control in Optical Fiber Communication and Sensor Systems enables one to quickly grasp extensive knowledge and latest development of polarization in optical fibers and will earn a place in the libraries of professors and teachers of photonics and related disciplines
