Teaching and Learning at a Distance Michael Simonson, Susan M. Zvacek, Sharon Smaldino, 2019-07-01 Teaching and Learning at a Distance is written for introductory distance education courses for preservice or in service teachers and for training programs that discuss teaching distant learners or managing distance education systems This text provides readers with the basic information needed to be knowledgeable distance educators and leaders of distance education programs The teacher or trainer who uses this book will be able to distinguish between appropriate uses of distance education In this text we take the following themes The first theme is the definition of distance education Before we started writing the first edition of Teaching and Learning at a Distance we carefully reviewed the literature to determine the definition that would be at the foundation of our writing This definition is based on the work of Desmond Keegan but is unique to this book This definition of distance education has been adopted by the Association for Educational Communications and Technology and by the Encyclopedia Britannica The second theme of the book was the importance of research to the development of the contents of the book The best practices presented in Teaching and Learning at a Distance are validated by scientific evidence Certainly there are rules of thumb but we have always attempted to only include recommendations that can be supported by research The third theme of Teaching and Learning at a Distance is derived from Richard Clark's famous quote published in the Review of Educational Research that states that media are mere vehicles that do not directly influence achievement Clark's controversial work is discussed in the book but is also fundamental to the book's advocacy for distance education in other words we authors did not make the claim that education delivered at a distance was inherently better than other ways people learn Distance delivered instruction is not a magical approach that makes learners achieve more The fourth theme of the book is equivalency theory Here we presented the concept that instruction should be provided to learners that is equivalent rather than identical to what might be delivered in a traditional environment Equivalency theory helps the instructional designer approach the development of instruction for each learner without attempting to duplicate what happens in a face to face classroom The

final theme for Teaching and Learning at a Distance is the idea that the book should be comprehensive that it should cover as much of the various ways instruction is made available to distant learners as is possible It should be a single source of information about the field *Your First Year As a High School Teacher* Lynne Marie Rominger, Suzanne Packard Laughrea, 2009-03-25 Survive Thrive in the Classroom From Day One Teaching high school students is the toughest job you ll ever love Of course often it is an acquired love You must learn to manage your students education and play parent counselor police officer and mentor Wow Now relax it doesn t have to be overwhelming With a little preparation you can ensure that you and your students get the most out of your time in the classroom and enjoy it Full of real world advice and answers for the complex issues facing today s high school teachers this down to earth and witty book will teach you how to create an atmosphere of cooperation learning and respect within your classroom Use this helpful guide as your personal mentor to achieve a successful and satisfying career as a high school teacher Earn straight A s your first year by knowing how to Create an attention grabbing and interactive teaching environment Manage difficult students and unique teenage problems Communicate educate and have fun with your students Balance the demands of old school administrators and pushy parents Fairly assess grade and evaluate students Develop effective and engrossing lesson plans Straightforward up to date and engaging I ve seen a lot of resource books for new teachers and this is the best of the bunch Wendell Geis continuing education administrator University of California Davis **Rubrics for Assessing Student Achievement in Science Grades K-12** Hays B.
