**INVESTMENT SUMMARY:** This section should include main reasons why you believe your stock is a BUY/SELL/HOLD. Common research ideas listed below:

- **SUMMARIZE 1<sup>ST</sup> REASON:** Supporting themes should start very basic and related to the company's forward looking statements or plans to open new locations, decrease expenses, increase production, etc.
- **SUMMARIZE 2<sup>ND</sup> REASON:** A common supporting theme would be your company's earnings and revenue. Highlight past earnings performance as well as the streets consensus for future expectations.
- **SUMMARIZE 3<sup>RD</sup> REASON:** Additional supporting metrics would be revenue growth, gross margin, operating margin, and any other forward looking price multiples (P/E, P/EBITDA, P/S, P/B, EV/EBITDA, EV/S, etc.) (Metric time periods... YOY, QvsQ, etc.)

**BUSINESS DESCRIPTION:** This section should include a brief description of the company and its products and services. It should also convey a clear understanding of the company's economics, including a discussion of key drivers of revenues and expenses. Much of this information can be sourced from the company itself and via regulatory filings, as well as industry publications.

## **Sample Stock Analyst Report:**

Analyzing the Analysts United States. Congress. House. Committee on Financial Services. Subcommittee on Capital Markets, Insurance, and Government Sponsored Enterprises, 2001      *Financial Analysts' Forecasts and Stock Recommendations* Sundaresh Ramnath, Steve Rock, Philip B. Shane, 2008 *Financial Analysts Forecasts and Stock Recommendations* reviews research related to the role of financial analysts in the allocation of resources in capital markets. The authors provide an organized look at the literature with particular attention to important questions that remain open for further research. They focus research related to analysts' decision processes and the usefulness of their forecasts and stock recommendations. Some of the major surveys were published in the early 1990s and since then no less than 250 papers related to financial analysts have appeared in the nine major research journals that we used to launch our review of the literature. The research has evolved from descriptions of the statistical properties of analysts' forecasts to investigations of the incentives and decision processes that give rise to those properties. However, in spite of this broader focus, much of analysts' decision processes and the market's mechanism of drawing a useful consensus from the combination of individual analysts' decisions remain hidden in a black box. What do we know about the relevant valuation metrics and the mechanism by which analysts and investors translate forecasts into present equity values? What do we know about the heuristics relied upon by analysts and the market and the appropriateness of their use? *Financial Analysts Forecasts and Stock Recommendations* examines these and other questions and concludes by highlighting areas for future research.
