Dear Dr Roberts

Re: Ms Anne Hall, DOB 19.9.1965

Thank you for seeing Ms Hall, a 44-year-old secondary school teacher, who is presenting with a two-week history of symptoms of dysphagia for solids, epigastric pain radiating posteriorly to T12 level, and concomitant weight loss. The symptoms follow a constant course.

Ms Hall believes the problem commenced after an upper respiratory tract infection two weeks ago for which she self-prescribed an over-the-counter Chinese herbal product with unknown ingredients. However, she has also recently increased her coffee consumption and takes aspirin 2-3 times a month. She has a history of dyspepsia (2004), and dermatitis for which she was prescribed oral and topical cortisone. There are no apparent signs of anxiety. She has not smoked for the last 15 years. She drinks socially (mainly spirits), has a family history of peptic ulcer disease and is allergic to codeine. Her BMI is currently 28.2.

My provisional diagnosis at this point is gastro-oesophageal reflux with possible stricture. I am therefore referring Ms Hall to you for further investigation.

Thank you for assessment and ongoing management of this woman. If you require any further information, please do not hesitate to contact me.

Yours sincerely

Doctor
