The book is interdisciplinary and aimed at professionals: traffic and road engineers, vehicle designers, law enforcers, and transport planners. The authors examine trends in performance of OECD countries and highlight the public health and systems approach of traffic safety with the vulnerable road user in focus. Topics include land use, transportation planning, mobility, and safety; safety education and legislation; accident analysis; road safety research; human tolerance to injury; vehicle design; safety in construction zones; safety in urban areas; traffic calming; public transportation safety laws and policies; and pre-hospital care of the injured.
