Electrical Conquest W. Bernard Carlson,Erik M Conway,2024-01-08 This book drawing on fresh scholarship
investigates electrification in new places and across different time periods While much of our understanding of electrification
as a historical process is based on the seminal work done by Thomas P Hughes in *Networks of Power* 1983 the scholars in
this volume expand and revise Hughes systems approach to suggest that electrification is a heterogeneous and contingent
process Moreover the contributors suggest that the conquest of the world by electricity remains incomplete despite more
than a century elapsing Above all though this book provides context for thinking about what lies ahead as humans continue
their conquest of the earth through electricity As we become increasingly dependent on electricity to power our lights heat
and cool our homes turn the wheels of industry and keep our information systems humming so we are ever more vulnerable
when the grid runs into trouble Chapter Surveying the Landscape The Oil Industry and Alternative Energy in the 1970s is
