Practical Assessment Task Phase 2014

**Tarja Nikula, Emma Dafouz, Pat
Moore, Ute Smit**

Practical Assessment Task Phase 2014:

Assessment for Learning Rita Berry, 2008-09-01 Assessment is an important part of effective teaching and learning. It allows achievements to be recognized and helps both teachers and learners to reflect on and review their performance and progress. While assessment has long been an end of learning activity to measure what learners can do, the outcome oriented approach does not always foster learning motivation effectively. A new perspective now encourages ongoing appraisal in the classroom to improve learning. This book reflects current thinking of assessment with a stated focus on assessment for learning AfL. It informs teachers about the latest developments and provides teachers with important tools for integrating assessment in the classroom. The discussions on assessment theories are in depth and the examples used for illustrating the concepts are plentiful.

Conceptualising Integration in CLIL and Multilingual Education Tarja Nikula, Emma Dafouz, Pat Moore, Ute Smit, 2016-08-18 Content and Language Integrated Learning (CLIL) is a form of education that combines language and content learning objectives, a shared concern with other models of bilingual education. While CLIL research has often addressed learning outcomes, this volume focuses on how integration can be conceptualised and investigated. Using different theoretical and methodological approaches ranging from socioconstructivist learning theories to systemic functional linguistics, the book explores three intersecting perspectives on integration concerning curriculum and pedagogic planning, participant perceptions and classroom practices. The ensuing multidimensionality highlights that in the inherent connectedness of content and language, various institutional, pedagogical and personal aspects of integration also need to be considered.

ECCWS2014-Proceedings of the 13th European Conference on Cyber warfare and Security Andrew Liaropoulos, George Tsihrintzis, 2014-03-07 Forward with Classics Arlene Holmes-Henderson, Steven Hunt, Mai Musié, 2018-08-09 Despite their removal from England's National Curriculum in 1988 and claims of elitism, Latin and Greek are increasingly re-entering the mainstream educational arena. Since 2012, there have been more students in state-maintained schools in England studying classical subjects than in independent schools, and the number of schools offering Classics continues to rise in the state-maintained sector. The teaching and learning of Latin and Greek is not, however, confined to the classroom; community-based learning for adults and children is facilitated in newly established regional Classics hubs in evenings and at weekends in universities as part of outreach and even in parks and in prisons. This book investigates the motivations of teachers and learners behind the rise of Classics in the classroom and in communities and explores ways in which knowledge of classical languages is considered valuable for diverse learners in the 21st century. The role of classical languages within the English educational policy landscape is examined as new possibilities exist for introducing Latin and Greek into school curricula. The state of Classics education internationally is also investigated with case studies presenting the status quo in policy and practice from Australasia, North America, the rest of Europe and worldwide. The priorities for the future of Classics education in these diverse locations are compared and contrasted by the
