Chen,2019-08-20 This book likely the first of its kind in the English language explores Chinese for specific and professional purposes CSP in terms of theorizing and developing practical applications for language teaching and learning While research in language for specific purposes is thriving for languages such as English there has been comparatively little such research conducted for Chinese This volume attempts to fill the gap by bringing together practitioners from a broad international scholarly community who share common interests yet diverse orientations Seventeen papers are included and address four broad thematic categories 1 academic Chinese 2 business Chinese 3 Chinese for medicine and health care and 4 Chinese for other broadly defined services and industries diplomacy tourism wine tasting etc Representing the state of the art in CSP research the book offers an indispensable guide for anyone interested in theoretical and practical issues in this area of applied Chinese language studies *Research in Chinese as a Second Language* Istvan Kecskes,2013-05-28 The book aims to address one of the main problems of Chinese language teaching lack of research base The rapidly growing interest in Chinese language teaching has not resulted in the development of a strong research background This book attempts to

change the current situation The volume consists of three chapters Chapter I Research Base for Practice contains three papers each of which uses research findings as a basis for solving issues connected with practical language teaching Chapter II Integrating Culture and Language is about one of the most intriguing topics of current language oriented research how to integrate culture into the process of language teaching Chapter III Acquisition of Language Structures consists of studies that investigate the acquisition of certain grammatical structures in Chinese There are only a few papers in the literature on this issue so the articles in this chapter are especially important for further research One of the most important features of the volume is that each paper makes an attempt to bring together theory and practice by focusing on theory building based on practice or theory application in practice Thus the book can be recommended to both researchers and practitioners

Politics of Difference in Taiwan T.W. Ngo, Hong-zen Wang, 2011-05-10 Taiwan has been hailed as a successful case of democratization Compared with many other nations the transition from authoritarian rule occurred in a rather orderly fashion Group consciousness emerged as a reaction to the decades long suppression of cultural diversity under martial law as different social groups competed fiercely to exert their political subjectivity This volume is the first study to examine the politics of difference in Taiwan It aims to go beyond ethnic identity as the sole concern for group boundary to acknowledge the interests of other marginalized groups and to look behind reified group boundaries in order to discover group differences as mediated social relations based on overlapping boundaries rather than exclusive opposition In exploring the politics of difference among minority groups and the problems arising from their struggle over political recognition the book challenges the assumptions that groups are ontologically given that groups are internally homogenous and that the particularistic identities have no overlap The chapters offer a broad coverage of major social groups including ethnic minorities recent migrants gay and lesbian groups and marginalized workers They offer perspective analyses of the ongoing struggles by minority groups to overcome subordination
