Overinvested Nina Bandelj, 2026-01-20 What happens when children become investment projects and child rearing becomes exhausting labor Parents are exhausted When did raising children become such all consuming never ending incredibly expensive and emotionally absorbing effort In this eye opening book Nina Bandelj explains how we got to this point how we turned children into financial and emotional investments and child rearing into laborious work At the turn of the twentieth century children went from being economically useful often working to support families to being seen by their parents as vulnerable and emotionally priceless In the new millennium however parents have become overinvested in the emotional economy of parenting Analyzing in depth interviews with parents national financial datasets and decades of child rearing books Bandelj reveals how parents today spend save and even go into debt for the sake of children They take on parenting as the hardest but most important job and commit their entire selves to being a good parent The economization and emotionalization of society work together to drive parental overinvestment offering a dizzying array of products and platforms to turn children into human capital from financial instruments to extracurricular programs to therapeutic parenting advice And yet Bandelj warns the privatization of child rearing and devotion of parents monies emotions and souls ultimately hurt the well being of children parents and society Overinvested offers a compelling argument that we should reimagine children and what it means to raise them *CRC Concise Encyclopedia of Nanotechnology* Boris Ildusovich Kharisov, Oxana Vasilievna Kharissova, Ubaldo Ortiz-Mendez, 2016-01-06 The CRC Concise Encyclopedia of Nanotechnology sets the standard against which all other references of this nature are measured As such it is a major resource for both skilled professionals and novices to nanotechnology The book examines the design application and utilization of devices techniques and technologies critical to research at the **Reading and Writing Instruction for PreK Through First Grade Classrooms in a PLC at Work®** Erica Martin, Lisa May, 2020-06-16 Part of the Every Teacher Is a Literacy Teacher series Building a solid literacy foundation is of paramount importance during a learner s early school years Closely aligned to the PLC at Work process this practical resource outlines how collaborative teams can fully support and encourage literacy development in preK through first grade Readers will discover a variety of tools and strategies to design standards aligned instruction develop quality assessments provide timely interventions and more Teachers can use this resource to address specific literacy challenges and situations found within their grade band Understand the role PLCs and collaborative teams play in literacy development Obtain strategies and tools such as the Pre Unit Protocol for unpacking and clarifying literacy

The Imperial Church Katherine D. Moran, 2020-05-15 Through a fascinating discussion of religion's role in the rhetoric of American civilizing empire The Imperial Church undertakes an exploration of how Catholic mission histories served as a useful reference for Americans narrating US settler colonialism on the North American continent and seeking to extend military political and cultural power around the world Katherine D. Moran traces historical celebrations of Catholic missionary histories in the upper Midwest Southern California and the US colonial Philippines to demonstrate the improbable centrality of the Catholic missions to ostensibly Protestant imperial endeavors Moran shows that as the United States built its continental and global dominion and an empire of production and commerce in the Gilded Age and Progressive Era Protestant and Catholic Americans began to celebrate Catholic imperial pasts She demonstrates that American Protestants joined their Catholic compatriots in speaking with admiration about historical Catholic missionaries the Jesuit Jacques Marquette in the Midwest the Franciscan Junipero Serra in Southern California and the Spanish friars in the Philippines Comparing them favorably to the Puritans Pilgrims and the American Revolutionary generation commemorators drew these missionaries into a cross-confessional pantheon of US national and imperial founding fathers In the process they cast Catholic missionaries as gentle and effective agents of conquest uplift and economic growth arguing that they could serve as both origins and models for an American civilizing empire The Imperial Church connects Catholic history and the history of US empire by demonstrating that the religious dimensions of American imperial rhetoric have been as cross-confessional as the imperial nation itself

Challenging Formalization in Education and Beyond Peter Serdyukov, 2022-11-03 Challenging Formalization in Education and Beyond addresses the effects of today's attempts to organize knowledge processes and performance in education particularly in its ever-growing digital environments As on-site blended and fully online learning become deeply interdependent secondary and higher education managers and instructors who seek to integrate apply and teach within these formats using standardized rules assessments algorithms and accountability structures may be doing unintended harm to their students Focusing on students' performance health cognition behavior and learning outcomes this book analyses how current trends methods and policies in formalization can be challenged and corrected to ensure high quality education Scholars educators administrators and designers of traditional asynchronous precision automated and micro learning formats will come away with new insights and pragmatic

Understanding Developmental Dyslexia: Linking Perceptual and Cognitive Deficits to Reading Processes Pierluigi Zoccolotti,Peter F. de Jong,Donatella Spinelli,2016-06-24 Understanding the mechanisms responsible for developmental dyslexia DD is a key challenge for researchers A large literature mostly concerned with learning to read in opaque orthographies emphasizes phono logical interpretations of the disturbance Other approaches focused on the visual per ceptual aspects of orthographic coding Recently this perspective was supported by imaging data showing that individuals with DD have hypo activation in occipito temporal areas a finding common to both transpar ent and opaque orthographies

Nevertheless it is difficult to infer causal relationships from activation data Accommodating these findings within the cognitive architecture of reading processes is still an open issue This is a general problem which is present in much of the literature For example several studies investigating the perceptual and cognitive abilities that distinguish groups of children with and without DD failed to provide explicit links with the reading process Thus several areas of investigation e g acoustic deficits or magnocellular deficiencies have been plagued by replication failures Furthermore much research has neglected the possible contribution of comorbid symptoms By contrast it is now well established that developmental disorders present a large spectrum of homotopic and heterotopic co morbidities that make causal interpretations problematic This has led to the idea that the etiology of learning difficulties is multifactorial thus challenging the traditional models of DD Recent genetic studies provide information on the multiple risk factors that contribute to the genesis of the disturbance Another critical issue in DD is that much of the research has been conducted in English speaking individuals However English is a highly irregular orthography and doubts have been raised on the appropriateness of automatically extending interpretations based on English to other more regular orthographies By contrast important information can be gotten from systematic comparisons across languages Thus the distinction between regular and irregular orthographies is another potentially fruitful area of investigation Overall in spite of much research current interpretations seem unable to integrate all available findings Some proposals focus on the cognitive description of the reading profile and explicitly ignore the distal causes of the disturbance Others propose visual acoustic or phonological mechanisms but fail to link them to the pattern of reading impairment present in different children The present Research Topic brings together studies based on different methodological approaches i e behavioural studies examining cognitive and psycholinguistic factors eye movement investigations biological markers neuroimaging and genetic studies involving dyslexic groups with and without comorbid symptoms and in different orthographies transparent and opaque to identify the mechanisms underlying DD The RT does not focus on a single model or theory of dyslexia but rather brings together different approaches and ideas which we feel are fruitful for a deeper understanding developmental dyslexia

Sustainability Standards and Global Governance Archana Negi,Jorge Antonio Pérez-Pineda,Johannes Blankenbach,2020-07-02 This open access book focuses on the issue of sustainability standards from the perspective of both global governance frameworks and emerging economies It stems from the recognition that the accelerated pace of economic globalization has generated production and consumption patterns that are generating sustainability concerns Sustainability standards and regulations are increasingly being used in a bid to make global consumption and production more sustainable Given the dense inter connectedness of economic affairs globally the use of sustainability standards has become a concern of global governance who face the challenge of achieving a balance between the use of standards for genuine sustainability objectives and not allowing them to turn into instruments of protectionism or coercion The emerging economies given their increasing engagement with the global economy are most

impacted by the use of sustainability standards The emphasis of emerging economies in this book is retained both by using case studies from these economies and by collating perceptions and assessments of those located in these economies The case studies included span sectors such as palm oil forestry food quality vehicular emissions and water standards and address the problems unique to the emerging economies including capacity building for compliance with standards adapting international standards in domestic contexts and addressing the exclusion of small and medium enterprises etc Complex interfaces and dynamics of a global nature are not limited to the thematic of this book but also extend to the process through which it was written This book brings together insights from developed as well as emerging economies Germany India Mexico Brazil Indonesia Pakistan Mexico and China It also brings together scholars and practitioners to jointly ponder upon the conceptual aspects of the global frameworks for sustainability standards This book is a very useful resource for researchers and practitioners alike and provides valuable insights for policy makers as well
