

The general formula for the area of a triangle is well known. While the formula shows the letters b and h , it is actually the pattern of the formula that is important. The area of a triangle equals $\frac{1}{2}$ the length of one side times the height drawn to that side (or an extension of that side).

$$A = \frac{1}{2}ah$$

where a represents the side (base)
and h represents the height drawn to that
side.

Using trigonometry, let's take another look at this diagram.

- 1) In the right triangle CDA, we can state that: $\sin C =$
- 2) Isolate h .
