

To Improve Memory

2 pages | 354 words

In psychology, memory is an organism's capability to store, preserve, and then recover the same information. Generally, the classifications of memory used the sensory, short-term and long-term memories. The first two classes are only available for a short period of time compared to long-term memory which could last for a life-time.

The storage process for the brain undergoes an incident in which connections between neuron groups are strengthened. Its patterns are recorded by the brain in an occurrence called the "engram". These engrams will be stored and will remain inactive until they retrieved (Schacter, 1996). The major factor that would affect memory storage would be time; the past is always replaced by recent events and engrams not recalled are simply slipping away from the mind. Improving memory by converting information into long-term-memory can be accomplished by linking it into something that is in the memory.

One of the most popular techniques in improving memory is by the use of mnemonics. This is usually done by making associations between something that is easily remembered and one that is not. Another method would be to gather all the initial letters from the list to be memorized, and then make a single word out of it. Sometimes the word formed can be directly or indirectly related to the information aimed but it could also be unrelated at some instances, depending on the situation.

Researchers state that increasing the supply of oxygen to the brain is a good way of developing a better memory. The best way to achieve this is by undergoing proper and regular exercise. Stress should also be lessened, as well as depression. Sufficient sleeping time should also be done. A better memory can also be achieved if the individual undergoes constant intellectual activities like reading. Keeping the brain healthy will certainly help in reducing memory loss and enhances ones memory retrieval.

Sports-Related Concussions in Youth National Research Council, Institute of Medicine, Board on Children, Youth, and Families, Committee on Sports-Related Concussions in Youth, 2014-02-04 In the past decade few subjects at the intersection of medicine and sports have generated as much public interest as sports related concussions especially among youth Despite growing awareness of sports related concussions and campaigns to educate athletes coaches physicians and parents of young athletes about concussion recognition and management confusion and controversy persist in many areas Currently diagnosis is based primarily on the symptoms reported by the individual rather than on objective diagnostic markers and there is little empirical evidence for the optimal degree and duration of physical rest needed to promote recovery or the best timing and approach for returning to full physical activity Sports Related Concussions in Youth Improving the Science Changing the Culture reviews the science of sports related concussions in youth from elementary school through young adulthood as well as in military personnel and their dependents This report recommends actions that can be taken by a range of audiences including research funding agencies legislatures state and school superintendents and athletic directors military organizations and equipment manufacturers as well as youth who participate in sports and their parents to improve what is known about concussions and to reduce their occurrence Sports Related Concussions in Youth finds that while some studies provide useful information much remains unknown about the extent of concussions in youth how to diagnose manage and prevent concussions and the short and long term consequences of concussions as well as repetitive head impacts that do not result in concussion symptoms The culture of sports negatively influences athletes self reporting of concussion symptoms and their adherence to return to play guidance Athletes their teammates and in some cases coaches and parents may not fully appreciate the health threats posed by concussions Similarly

military recruits are immersed in a culture that includes devotion to duty and service before self and the critical nature of concussions may often go unheeded According to Sports Related Concussions in Youth if the youth sports community can adopt the belief that concussions are serious injuries and emphasize care for players with concussions until they are fully recovered then the culture in which these athletes perform and compete will become much safer Improving understanding of the extent causes effects and prevention of sports related concussions is vitally important for the health and well being of youth athletes The findings and recommendations in this report set a direction for research to reach this goal

Person Memory (PLE: Memory) Reid Hastie, Thomas Ostrom, Ebbe Ebbesen, Robert Wyer, David Hamilton, Donal Carlston, 2014-05-09 Originally published in 1980 this title came about after many late night discussions between the authors during a 3 week workshop on Mathematical Approaches to Person Perception in 1974 In subsequent meetings a mutual interest emerged in the development of cognitive information processing metaphors for human thought and their application to problems of social perception memory and judgment Within the context of modern research on social cognition the most distinctive aspects of the authors work was its empirical focus on how people cognitively represent people in memory and its theoretical emphasis on models of cognitive organization and process They concluded that an adequate theory of social memory was the necessary foundation for solutions to many questions concerning social perception and judgment that had dominated the 1974 workshop This volume summarizes work conducted between 1974 and 1979 on social memory by these authors In addition to six chapters summarizing individual research programs the volume includes a general introduction and a concluding theoretical integration

Thinking David Hardman, Laura Macchi, 2004-01-09 The first international handbook to bring the areas of reasoning judgment and decision making together now in paperback format The book brings three of the important topics of thinking together reasoning judgment and decision making and discusses key issues in each area The studies described range from those that are purely laboratory based to those that involve experts making real world judgments in areas such as medical and legal decision making and political and economic forecasting International collection of original chapters by leading researchers in the field Several chapters contain important new theoretical perspectives Paperback version is more affordable for individual researchers

High Performance Embedded Architectures and Compilers Tom Conte, Nacho Navarro, Wen-mei W. Hwu, Mateo Valero, Theo Ungerer, 2005-10-27 As Chairmen of HiPEAC 2005 we have the pleasure of welcoming you to the proceedings of the first international conference promoted by the HiPEAC Network of Excellence During the last year HiPEAC has been building its clusters of researchers in computer architecture and advanced compiler techniques for embedded and high performance computers Recently the Summer School has been the seed for a fruitful collaboration of renowned international faculty and young researchers from

23 countries with fresh new ideas Now the conference promises to be among the premier forums for discussion and debate on these research topics The prestige of a symposium is mainly determined by the quality of its technical program This first program lived up to our high expectations thanks to the large number of strong submissions The Program Committee received a total of 84 submissions only 17 were selected for presentation as full length papers and another one as an invited paper Each paper was rigorously reviewed by three Program Committee members and at least one external referee Many reviewers spent a great amount of effort to provide detailed feedback In many cases such feedback along with constructive shepherding resulted in dramatic improvement in the quality of accepted papers The names of the Program Committee members and the referees are listed in the proceedings The net result of this team effort is that the symposium proceedings include outstanding contributions by authors from nine countries in three continents In addition to paper presentations this first HiPEAC conference featured two keynotes delivered by prominent researchers from industry and academia
