Why Am I a Jew? Michael Baum, 2022-01-06 The book starts by considering mankind's role in the complex ecological system of our planet and then considers the place of mankind in the cosmos while also looking inward at our own microcosm It then explains how these scientific insights lead to the ontological search for God The good the bad and the ugly sides of religious beliefs are considered and it is suggested that we are looking for God in the wrong place The book then explains a justification for the author's apparent cognitive dissonance of retaining a Jewish

identity whilst denying the existence of a God with the attributes of man The author then argues that we should look for God in the infinitely small spaces within ourselves instead of the infinitely large spaces of the universe His God would not mind whether individuals believed in him or not so long as they practiced their life as the author practices his medicine in a never ending quest to improve the length and quality of the lives of his patients This book should improve the reader s knowledge of the philosophers who wrote on the ontology of God It also rediscovers that Baruch Spinoza had already reached the conclusions of modern day thinkers more than 350 years ago
