The Next Generation of Testing Hong Jiao, Robert W. Lissitz, 2015-11-01 The Race To The Top RTTP federal education policy fostered a new generation of state tests This policy advocated adopting common core standards which set a higher level of learning targets for students in the US K 12 education These standards are intended to assess higher order thinking skills and prepare students ready for college and career In the meantime they are aligned with those for international assessments which keep US students abreast of their international peers Furthermore the new generation of state tests requires the use of technology enhanced items to align student assessments with student learning environment Computer technology is indispensable to accomplish this goal Computer based tests related to common core standards are different from previous state computer based tests in two important aspects one is that the current version requires accurate assessment of students along all ability levels and the other is that it promotes the use of an efficient test delivery system

essentially the use of computerized adaptive assessment in K 12 state testing programs In addition to providing summative information about student learning the new common core tests add formative assessment component in the whole assessment system to provide timely feedback to students and teachers during the process of student learning and teacher instruction As with its predecessor the new assessment policy also holds teachers and schools accountable for student learning With the requirements by the new federal education policy states formed two consortia Partnership for Assessment of Readiness for College and Careers PARCC and Smarter Balanced Assessment Consortium SBAC to develop assessments in alignment with the new common core standards This book is based on the presentations made at the Thirteenth Annual Maryland Assessment Research Center s Conference on The Next Generation of Testing Common Core Standards Smarter Balanced PARCC and the Nationwide Testing Movement Experts from the consortia and nationwide overviewed the intention history and the current status of this nationwide testing movement Item development test design and transition from old state tests to the new consortia tests are discussed Test scoring and reporting are specially highlighted in the book The challenges related to standard setting for the new test especially in the CAT environment and linking performance standards from state tests with consortium tests were explored The issues of utilizing the consortium test results to evaluate students college and career readiness is another topic addressed in the book The last chapters address the critical issue of validity in the new generation of state testing programs Overall this book presents the latest status of the development of the two consortium assessment systems It addresses the most challenging issues related to the next generation of state testing programs including development of innovative items assessing higher order thinking skills scoring of such items standard setting and linkage with the old state specific standards and validity issues This edited book provides a very good source of information related to the consortium tests based on the common core standards Teaching to Exceed the English Language Arts Common Core State Standards Richard Beach, Allen Webb, Amanda Haertling Thein, 2015-12-07 Timely thoughtful and comprehensive this text directly supports pre service and in service teachers in developing curriculum and instruction that both addresses and exceeds the requirements of the Common Core State Standards Adopting a critical inquiry approach it demonstrates how the Standards highest and best intentions for student success can be implemented from a critical culturally relevant perspective firmly grounded in current literacy learning theory and research It provides specific examples of teachers using the critical inquiry curriculum framework of identifying problems and issues adopting alternative perspectives and entertaining change in their classrooms to illustrate how the Standards can not only be addressed but also surpassed through engaging instruction The Second Edition provides new material on adopting a critical inquiry approach to enhance student engagement and critical thinking planning instruction to effectively implement the CCSS in the classroom fostering critical response to literary and informational texts using YA literature and literature by authors of color integrating drama activities into literature and speaking listening instruction teaching informational

explanatory argumentative and narrative writing working with ELL students to address the language Standards using digital tools and apps to respond to and create digital texts employing formative assessment to provide supportive feedback preparing students for the PARCC and Smarter Balanced assessments using the book's wiki site <http://englishccss.pbworks.com> for further resources

Teaching the Standards Harriet D. Porton, 2013-04-09 With the upcoming implementation of CCSS in E LA and mathematics in 2014 and the expected implementation in science history social studies and technical subjects educators need a grounded specific text on how to scaffold students from where they are to where they need to be according to the Common Core State Standards The CCSS assume that students already have more skills prior knowledge and motivation than may be real Therefore teachers and administrators require some assistance for helping all students reach the rigorous demands of CCSS This text provides specific successful strategies that are targeted for each of the secondary content areas This text is designed to help all educators translate the CCSS so that it can become a guiding force not a stumbling block
