Biotechnological Approaches for Medicinal and Aromatic Plants Nitish Kumar, 2018-09-11 For the majority of the world's population, medicinal and aromatic plants are the most important source of life-saving drugs. Biotechnological tools represent important resources for selecting, multiplying, and conserving the critical genotypes of medicinal plants. In this regard, in vitro regeneration holds tremendous potential for the production of high-quality plant-based medicines, while cryopreservation, a long-term conservation method using liquid nitrogen, provides an

opportunity to conserve endangered medicinal and aromatic plants In vitro production of secondary metabolites in plant cell suspension cultures has been reported for various medicinal plants and bioreactors represent a key step toward the commercial production of secondary metabolites by means of plant biotechnology Addressing these key aspects the book contains 29 chapters divided into three sections Section 1 In vitro production of secondary metabolites Section 2 In vitro propagation genetic transformation and germplasm conservation Section 3 Conventional and molecular approaches

Modern Sample Preparation Approaches for Separation Science Nuno Neng,2019-09-27 This book will provide the most recent knowledge and advances in Sample Preparation Techniques for Separation Science Everyone working in a laboratory must be familiar with the basis of these technologies and they often involve elaborate and time consuming procedures that can take up to 80% of the total analysis time Sample preparation is an essential step in most of the analytical methods for environmental and biomedical analysis since the target analytes are often not detected in their in situ forms or the results are distorted by interfering species In the past decade modern sample preparation techniques have aimed to comply with green analytical chemistry principles leading to simplification miniaturization easy manipulation of the analytical devices low costs strong reduction or absence of toxic organic solvents as well as low sample volume requirements Modern Sample Preparation Approaches for Separation Science also provides an invaluable reference tool for analytical chemists in the chemical biological pharmaceutical environmental and forensic sciences
