Undersea Vehicles and National Needs National Research Council, Division on Engineering and Physical Sciences, Commission on Engineering and Technical Systems, Committee on Undersea Vehicles and National Needs, 1996-12-19 The United States faces decisions requiring information about the oceans in vastly expanded scales of time and space and from oceanic sectors not accessible with the suite of tools now used by scientists and engineers Advances in guidance and control communications sensors and other technologies for undersea vehicles can provide an opportunity to

understand the oceans influence on the energy and chemical balance that sustains humankind and to manage and deliver resources from and beneath the sea This book assesses the state of undersea vehicle technology and opportunities for vehicle applications in science and industry It provides guidance about vehicle subsystem development priorities and describes how national research can be focused most effectively **Orissa Gazette** Odisha (India),1963 *Report Number Series Used by the Office of Technical Information in Cataloging Reports* U.S. Atomic Energy Commission,1960 **Research Summary** Jet Propulsion Laboratory (U.S.),1960 *Nuclear Safety* ,1961 Nuclear Science Abstracts ,1975 **How We Teach Science** John L. Rudolph,2019-06-01 A former Wisconsin high school science teacher makes the case that how and why we teach science matters especially now that its legitimacy is under attack Why teach science The answer to that question will determine how it is taught Yet despite the enduring belief in this country that science should be taught there has been no enduring consensus about how or why This is especially true when it comes to teaching scientific process Nearly all of the basic knowledge we have about the world is rock solid The science we teach in high schools in particular laws of motion the structure of the atom cell division DNA replication the universal speed limit of light is accepted as the way nature works Everyone also agrees that students and the public more generally should understand the methods used to gain this knowledge But what exactly is the scientific method Ever since the late 1800s scientists and science educators have grappled with that question Through the years they ve advanced an assortment of strategies ranging from the laboratory method to the five step method to science as inquiry to no method at all How We Teach Science reveals that each strategy was influenced by the intellectual cultural and political circumstances of the time In some eras learning about experimentation and scientific inquiry was seen to contribute to an individual s intellectual and moral improvement while in others it was viewed as a way to minimize public interference in institutional science John Rudolph shows that how we think about and teach science will either sustain or thwart future innovation and ultimately determine how science is perceived and received by the public Resources in Education ,1988-11 Ancillary materials United States. Advisory Committee on Human Radiation Experiments,1995 *Final Report: Ancillary materials* United States. Advisory Committee on Human Radiation Experiments,1995 **Hitler's Uranium Club** Jeremy Bernstein,2013-03-09 From April through December of 1945 ten of Nazi Germany s greatest nuclear physicists were detained by Allied military and intelligence services in a kind of gilded cage at Farm Hall an English country manor near Cambridge The physicists knew the Reich had failed to develop an atomic bomb and they soon learned from a BBC radio report on August 6 that the Allies had succeeded in their own efforts to create such a weapon But what they did not know was that many of their meetings and private conversations were being monitored and recorded by British agents This book contains the complete collection of transcripts that were made from these secret recordings providing an unprecedented view of how the German scientists including two Nobel Laureates thought and spoke about their roles during the war Publication Catalog of the U.S. Department of Health and Human Services United
