Bonnici, 2020-12-15 Today the entire success of a school seems to be the responsibility of the principal and the teachers The thesis of this book is that principals and teachers can only take a school so far because of other factors that also impact on the success or failure of a school 1 Federal state local and district regulations and policies 2 the physical plant and location of the school 3 parents 4 students 5 the non teaching staff The book explores all these but also has an underlying theme Money It is a cliché that if a school has more money it will have better results Monies allocated to education do have an impact but poverty level and income inequality have an equal if not greater impact on school success on the national state and local levels Principals and teachers have absolutely no control on poverty and income inequality which negatively impact schools regardless of how dedicated and hard working the pedagogical staff After exploring the other factors impacting on school success the book will look at teachers and principals not from the viewpoint of what they can do but the viewpoint of their limitations Much of this is economic leading to high staff turnover and therefore a lack of continuity in a school Reflective Theory and Practice in Teacher Education Robyn Brandenburg, Kathryn Glasswell, Mellita Jones, Josephine Ryan, 2017-03-30 This book offers a detailed examination of reflective practice in teacher education In the current educational context where reflective practice has been mandated in professional standards for teachers in many countries it analyses research based evidence for the power of reflective practice to shape better educational outcomes The book presents multiple theoretical and practical views of this often taken for granted practice so that readers are challenged to consider how factors such as gender and race shape understandings of reflective practice Documenting approaches that enhance learning the contributions discuss reflective practice across the globe with a focus on pre service in service and university teachers At a time when there is pressure to measure teachers work through standardised tests the book highlights the professional thinking that is integral to teaching and demonstrates ways it can be encouraged in beginning teachers Aimed at the international community of teacher educators in schools and universities it also includes a critical examination of methodological issues in analysing and evaluating reflective practice and showcases the kind of reflective practice that empowers teachers and pre service teachers to make a difference to students **School Nursing** Janice Selekman, Robin Adair Shannon, Catherine F Yonkaitis, 2019-07-01 Produced in cooperation with the National Association of School Nurses this text includes comprehensive coverage of the multiple facets of school nursing from the foundations of practice and the roles and functions of a school nurse through episodic and chronic illness and behavioral issues to legal issues and leading and managing within school settings Written and edited by school nurses and pediatric experts it features real world tested best practices based on evidence and experience There s content here that you won t find in other books such as health assessments individualized health plan development mental health conditions including adolescent depression contemporary legal issues and current policy statements essential to school nursing Research Handbook on Classroom
