

Robertshaw®

The Robertshaw® "D" Series Pilot Ignition System was introduced in 1977. The system consisted of a 7000 BDER gas valve and one of two models of ignition control units. These units had a factory model number of SP720 (nonlockout) and SP750 (lockout). They are obsolete and no longer available. This modernization kit was designed to replace these obsolete ignition control units. The modernization kit will upgrade the old heat sensor/flame switch system to flame rectification.
