Flexible Automation and Intelligent Manufacturing: Establishing Bridges for More Sustainable Manufacturing Systems Francisco J. G. Silva, António B. Pereira, Raul D. S. G. Campilho, 2023-08-23 This

book reports on cutting edge research and developments in manufacturing giving a special emphasis to solutions fostering automation and sustainability Topics cover manufacturing process optimization remanufacturing machines and mechanical design CAD CAM CAE materials characterization and processing measurement and predictive maintenance techniques Further topics include artificial intelligence and IoT in manufacturing robotics and cutting edge issues in Industry 4.0 5.0 Based on proceedings of the 32nd edition of the International Conference on Flexible Automation and Intelligent Manufacturing FAIM 2023 held on June 18-22 2023 in Porto Portugal this first volume of a 2 volume set provides academics and professionals with extensive technical information on trends and technologies in manufacturing yet it also discusses challenges and practice oriented experience in all the above mentioned areas Robotic Welding, Intelligence and Automation Tzyh-Jong Tarn, Shan-Ben Chen, Changjiu Zhou, 2007-08-13 Robotic welding systems have been used in different types of manufacturing They can provide several benefits in welding applications The most prominent advantages of robotic welding are precision and productivity Another benefit is that labor costs can be reduced Robotic welding also reduces risk by moving the human welder operator away from hazardous fumes and molten metal close to the welding arc The robotic welding system usually involves measuring and identifying the component to be welded positioning it in position controlling the welding parameters and documenting the produced welds However traditional robotic welding systems rely heavily upon human intervention It does not seem that the traditional robotic welding techniques by themselves can cope well with uncertainties in the welding surroundings and conditions e.g. variation of weld pool dynamics fluxion solid weld torch and etc On the other hand the advent of intelligent techniques provides us with a powerful tool for solving demanding real world problems with uncertain and unpredictable environments Therefore it is interesting to gather current trends and to provide a high quality forum for engineers and researchers working in the field of intelligent techniques for robotic welding systems This volume brings together a broad range of invited and contributed papers that describe recent progress in this field
