

Child Observation Record

Child: Toby **Age:** 3 years and 3 months **Date:** 2 March 2015
Educator: Lorina **Setting:** Sandpit **Time:** 4:00pm

Observation

Toby walked over to the sandpit and picked up a toy truck. Carrying the truck with both of his hands, Toby walked over to 2 of his friends who were also in the sandpit. Toby said "I got a dump truck, there is more over there, get one too" he said to the others, pointing to where the trucks were. Toby sat in the sandpit put the truck in front of him and used his hands he began to scoop up sand and fill the back of the truck. When Toby filled the back of the truck, he pushed it across the sandpit while kneeling. "Too heavy, hard to push" he commented. Toby stopped pushing and then began to empty the sand from the back of the truck. Once the sand was completely off the back of the truck, Toby pushed it across the sandpit again. "Look, I can push it fast now" he said.

Interpretation

Through this experience it is evident that Toby explores the environment and manipulates objects and experiments with cause and effect, trial and error and motion. *Toby pushes the truck across the sandpit and says "Too heavy, hard to push". Then he empties sand from the back of the truck and pushes it across the sandpit again. "Look, I can push it fast now" Toby comments.*

Grotewell,Yanus R. Burton,2008

This book focuses on early childhood education which spans the human life from birth to age 8. Infants and toddlers experience life more holistically than any other age group. Social, emotional, cognitive, language, and physical lessons are not learned separately by very young children. Adults who are most helpful to young children interact in ways that understand that the child is learning from the whole experience, not just that part of the experience to which the adult gives attention. Although early childhood education does not have to occur in the absence of the parent or primary caregiver, this term is sometimes used to denote education by someone other than these. The parent or primary caregiver. Both research in the field and early childhood educators view the parents as an integral part of the early childhood education process. Early childhood education takes many forms depending on the theoretical and educational beliefs of the educator or parent. Other terms that is often used interchangeably with early childhood education are early childhood learning, early care, and early education. Much of the first two years of life are spent in the creation of a child's first sense of self or the building of a first identity. Because this is a crucial part of children's makeup, how they first see themselves, how they think they should function, how they expect others to function in relation to them, early care must ensure that, in addition to carefully selected and trained caregivers, links with family, home culture, and home language are a central part of program policy. If care becomes a substitute for rather than a support of family, children may develop a less than positive sense of who they are and where they come from because of their child care experience.
