A User's Guide to the Meade LXD55 and LXD75 Telescopes Martin Peston, 2010-04-28 I have owned telescopes for over 25 years since I was a young lad I purchased an LXD55 AR 6 Refractor in 2002 and was one of the first to own one in the UK I am also a proud owner of an LXD75 SC 8 Armed with these two very different telescopes I have spent many hours searching the skies for interesting objects using Meade s Autostar Goto facility My motivation to write a book about the LXD Goto telescope series first came from comments about an LXD55 AR 6 Refractor review that was published on the LXD55 com website From then on I have had regular emails from people asking technical questions about the telescope and which model is best suited for them Whilst attending Star parties in the UK I found that many LXD owners would struggle to use them even at a basic level especially if they have never owned or used an equatorially mounted Goto telescope before Since the first LXD55 models came out in early 2002 owners have struggled to find useful information to help them use the telescopes to the best advantage There have been mixed reactions about its quality and performance Hence this book is directed towards those

Bovy,E. Stern,2012-12-06 With the ever increasing number of opportunities in every aspect of modern life making choices becomes part of our daily routine It is thus only natural that social scientists have started to study human choice behavior Early efforts focused on modeling aggregate choice patterns of home buyers shoppers travelers and others Later studies aiming to achieve

more realistic results have concentrated on simulating disaggregate behavior. The most recent approach in choice research is the so called Discrete Choice Modeling. It is a front line area mainly in contemporary transportation geography and behavioral research. It focuses on individuals' decision making processes regarding the choice of destinations, modes, departure times and routes. Considerable research has been done on identifying and quantifying the general rules governing the individuals' choice behavior but to the best of our knowledge there is no single book that solely deals with route choice. The study of travelers' route choice in networks is primarily oriented towards gaining insight into their spatial choice behavior. How do people choose routes in a network, what do they know, what do they look for, which road characteristics play a role? On the basis of this information it is possible to design quantitative models aimed at predicting the use of routes dependent on the characteristics of the routes, those of the surrounding environment and those of the travelers. In this way traffic flows in the network can be calculated and the network performance can be evaluated.
