

Introductions: Formulating Problem Statements

Unit Targets: Students will produce an argumentative research paper that responds to either a practical or a conceptual problem.

Materials/Resources Needed:

- At least three or four well-written papers from previous years' students (anonymously presented and with the students' consent), with introductions omitted.
- *Student's Guide 7.2.2: "Sketch a Working Introduction"* and Chapter 13: "Writing your Final Introduction and Conclusion"

Activities:

1. Split students into pairs or small groups. Assign each group an essay to read and complete. First, they should fill out the Argument Boxes (picking out the claim, major reasons, and evidence for their paper).
2. Have each pair or group formulate a problem statement for their paper (see page 78), including the current situation, the research question, the significance of the question, and, ideally, the paper's answer to the question (see page 77).
3. Re-convene the class and discuss the problem statements students came up with for each paper. Each group should explain how the problem they have identified anticipates the paper, and, conversely, how the argument in the paper resolves the problem. As a class, discuss whether each problem matches the paper and why or why not. (What is the scope of the problem relative to that of the rest of the paper? Does the paper or outline adequately respond to the problem? Does the problem speak to the
