Statistical Quality Control for the Food Industry Merton Hubbard,2013-11-11 Considering the ability of food processing companies to consistently manufacture safe foods with uniform quality over the past 20 or 30 years without these new tools and new systems one might expect that quality control improvements would be marginal On the other hand these changes have already provided substantial opportunities for process and product improvement This second edition is intended to update the basic concepts and discuss some of the new ones Preface to the First Edition If an automobile tire leaks or an electric light switch fails if we are short changed at a department store or erroneously billed for phone calls not made if a plane departure is delayed due to a mechanical failure these are rather ordinary annoyances which we have come to accept as

normal occurrences Contrast this with failure of a food product If foreign matter is found in a food if a product is discolored or crushed if illness or discomfort occurs when a food product is eaten the consumer reacts with anger fear and sometimes mass hysteria The offending product is often returned to the seller or a disgruntled letter is written to the manufacturer In an extreme case an expensive law suit may be filed against the company The reaction is almost as severe if the failure is a difficult to open package or a leaking container There is no tolerance for failure of food products

International Food Safety Handbook Kees Van der Heijden,2019-07-05 Covers all aspects of food safety science regulation and labeling requirements integrating major developments in the fields of toxicology analytical chemistry microbiology hygiene and nutrition Designed to be a reference that bridges the gaps between science regulation and control of food safety While this might have been a rather ambitious aim in putting together this book the editors have certainly succeeded in gathering a group of experts from industry government agencies academia consumer groups and the media whose knowledge and expertise reflect the complex and multisectoral multidisciplinary nature of food safety Food Science and Technology

Auditing in the Food Industry M Dillon,C Griffith,2001-07-12 The food industry faces an unprecedented level of scrutiny Consumers are not only concerned with the safety and quality of food products but also the way in which they are produced At the same time the food industry has developed new ways of assuring appropriate standards for its products and their methods of production developing systems such as TQM and HACCP to identify and manage key steps in production These new methods require new skills in auditing Auditing in the food industry provides an authoritative guide to the range of standards and the auditing skills they demand Part one sets the scene with an introductory chapter reviewing developments in standards affecting the food industry There then follows chapters on how retailers audit their suppliers and how governments have moved from a traditional inspection role to one of regulatory verification with its emphasis on auditing the robustness of a business's own systems for managing safety and quality Part two examines the key aspects of safety and quality A first chapter reviews the ways retailers assess supplier HACCP systems There is then a chapter reviewing TQM systems that provides a context for a discussion of auditing techniques for HACCP based quality systems A final chapter looks at standards governing the analytical methods used in safety and quality control Part three considers newer standards that are becoming increasingly important in the food industry There are chapters on benchmarking an organisation against others as a way of improving performance auditing the impact of food processing operations on the environment and auditing organic food processing Auditing in the food industry is a valuable guide to the range of standards facing the food industry and the ways it can audit and thus improve the quality of its performance
