Nigeria Pentecostal Charismatic Movement possesses a distinctive flair that demands a holistic understanding of the movement's historical cultural fundamental and religious dimensions in a multifarious religious landscape. The disquisition of the movement's political cognizance identity power authority theology popular culture ethics and missiological impact in northern Nigeria presents a fine embroidery of their trials frustrations and challenges but inveterate in faith hope and love that opens up innovative panoramas of peaceful dialogical prospects and coexistence between Christians and Muslims in northern Nigeria.

In Nigeria Politics Religion Pentecostal Charismatic Power and Challenges Akintayo Emmanuel reconnoiters the complex missiological hindrances challenging the Nigerian Pentecostal Charismatic Movement. Their contextual missional landslide disheveled with complicated paradoxes in the way the Christian majority have responded to Muslims in northern Nigeria is anatomized. The Nigerian Pentecostal Charismatic Movement's puissance to solve some of Nigeria's political ideological cultural and spiritual dimensions of crisis and sectarian violence is achievable if the movement can mitigate her missiological hindrances. The responses of Nigerian Pentecostal Charismatic Movement to Nigeria's socio-political and ethno-religious complexities can construct a great future for the soul of Nigeria. They do not only have the capacity to provide the Christian alternatives to Nigeria's peculiarities; they can also stimulate Nigeria's deification among other nations by continuing to disentangle from unscrupulousness and atrociousness embedded within a reproach and opprobrium to any people.

Global Cities and Climate Change Taedong Lee, 2014-08-21. Cities have led the way to combat climate change by planning and implementing climate mitigation and adaptation policies. In contrast to national governments that have numerous obstacles to cope with global climate change in the international and national level, cities have become significant international actors in the field of international relations and environmental governance. *Global Cities and Climate Change* examines the translocal relations of cities that have made an international effort to collectively tackle climate change. Compared to state-centric terms, international or transnational relations, translocal relations look at policies politics and interactions of local governments in the globalized world. Using multi-methods such as multi-level analysis comparative case studies regression analysis and network analysis, Taedong Lee illustrates why some cities participated in transnational climate networks for cities under what conditions cities internationally cooperate with other cities with which cities and which factors influence climate policy performance. Legal Challenges at the End of the Fossil Fuel Era Daniel Iglesias Márquez, Clara Esteve-Jordà, Beatriz Felipe Pérez, 2024-09-24 This edited collection proposes a wide range of approaches to address the legal issues pertaining to the end of the fossil fuel era While the fossil fuel era is coming to an end both because of the inherent limits of its resources and because of the need to prevent to further pump out CO2 in an already saturated atmosphere the legal dispositions to ensure an ordered and rational shift toward cleaner energy still need to be developed Not only in relation to CO2 emissions themselves but also in relation to the manifold issues related to
