Vegetable Seeds Sutevee Sukprakarn,Sunanta Juntakool,Rukui Huang,Tom Kalb,2005 Many Asian farmers still need to learn the techniques required to produce vegetable seeds by themselves Seed production of vegetables is not as simple as it is for many self pollinated staple crops including beans and some cereal grains Specific techniques are required for every type of vegetable Aside from this F1 hybrid vegetable seeds are now prevailing in the market and farmers must be informed that the seeds obtained from the harvest of these crops cannot be used for sowing future crops This manual is made in an effort to help extension workers who are directly in contact with farmers **Seed production guide for the Tropics**

Theodor Doerfler,1976 **Policy guide to improve water productivity in small-scale agriculture** Food and Agriculture Organization of the United Nations,2020-05-01 In developing countries further progress of irrigation is essential for increasing food security and farmers income However developing small scale schemes remains a challenge due to multiple factors that must be taken into consideration such as diversity of small scale schemes a large number of water users social disharmony over the water use varying water demands of multi cropping systems heterogeneity of equipment over the scheme Furthermore on farm irrigation development has a major role in enhancing Agricultural Water Management AWM The previous development methods considered the improvement of single factor productivity but agriculture is undergoing a global shift from the single objective of outputs such as yield or net income to multiple objectives of increasing outputs while conserving natural resources Many pathways towards enhancement of Water Productivity WP are directly related to improving overall farm agronomic management irrigation fertilization plant density plant protection etc while external measures must be applied to ensure sustainability of introduced good practices lack of input markets scarce knowledge poor infrastructures water regulations etc Thus introducing irrigation practices to farmers must undergo a step wise process to ensure that costs do not outweigh achievable benefits and both institutional and technical environment are capable to sustain results This is the case in smallholders schemes where farmers are poorly resourced In order to address these issues the current policy guide presents a combined methodology which involves practical experiences drawn from FAO work in the three countries as well as researchers results to line up a set of feasible measures to improving WP **Seed Production**

Miller F. McDonald,Lawrence O. Copeland,2012-12-06 Plant breeders continue to make significant advances in developing high yield ing adaptable disease free crops These advances however are not realized until an efficient seed production system is in place that rapidly increases geneti cally superior crops and makes them available to the consumer in large quantities at a reasonable cost Successful seed production requires seed to be genetically pure free of admixtures and able to

establish rapidly a uniform stand Seed production is a complex process Rigorous production criteria are followed by both seed producer and seed companies to ensure that high quality seed is produced and marketed These criteria become even more stringent in hybrid seed production This volume identifies the factors most critical in a successful seed production operation The fundamental considerations common to all seed crops are established in Part I Principles of Seed Production From this foundation the practices of seed production are provided in detail in Part II Seed Production of Specific Crops
