

HOW TO SET THE TIME ON AN ANALOG WATCH

Gently pull the crown out as far as it will go. The watch will spring when the crown is in the "set" position. If the crown has a "screw-down locking crown," you may have to "unlock" it before you can pull the crown out to the "set" position. Rotate the crown counter-clockwise toward the bottom of the watch to unlock the crown. When it is unlocked, gently pull the crown out as far as it will go.

Now, rotate the crown clockwise toward the top of the watch to the "time" position (position for "set" position). If the day/date changes you are in the "set" position. If the day/date does not change you are in the "time" position. Proceed to set the correct time and push the crown all the way back in. Make sure hand to set the time and date in the date for correct day/date setting.

HOW TO SET THE DAY/DATE ON AN ANALOG WATCH

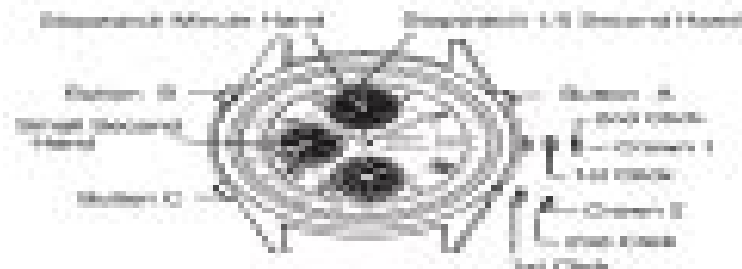

To set the day/date on an analog watch, gently pull the crown out to the "set" clock position.

Rotate the crown clockwise toward the top of the watch face. The date on the watch will advance. If the number "12" (indicating the window is too high) go past "12" and the crown will start at "1" again.

If your watch also displays a day/date window, set this by rotating the crown counter-clockwise toward the bottom of the watch face. The day/date will advance, going past Monday and repeating if necessary. If necessary, stop one day before the correct day/date is reached.

Now, pull the crown out another step and turn it clockwise to the "time" position. When you pass "12" the day and date should change automatically to the correct date. If you are setting the watch before noon, stop as soon as you get to the correct time and push the crown all the way back in. If you are setting the watch after noon, go past 12 noon before you stop at the correct time and push the crown all the way back in. If the watch is a "screw-down locking crown," unlock the crown after setting the correct time by pressing down on the crown as you turn it clockwise.
