Reclaiming Basque Language Nation And Cultural Activism The Basque Series:

Reclaiming Basque Jacqueline Urla, 2012-03-31 The Basque language Euskara is one of Europe's most ancient tongues and a vital part of today's lively Basque culture. *Reclaiming Basque* examines the ideology, methods, and discourse of the Basque language revitalization movement over the course of the past century and the way this effort has unfolded alongside the simultaneous Basque nationalist struggle for autonomy. Jacqueline Urla employs extensive long-term fieldwork, interviews, and close examination of a vast range of documents in several media to uncover the strategies that have been used to preserve and revive Euskara and the various controversies that have arisen among Basque language advocates. *Basque Immigrants and Nevada's Sheep Industry* Iker Saitua, 2019-03-20 Basque Immigrants and Nevada's Sheep Industry is a rich and complex exploration of the history of Basque immigration to the rangelands of Nevada and the interior West. It looks critically at the Basque shepherders in the American West and more broadly at the modern history of American foreign relations with Spain after the Second World War. Between the 1880s and the 1950s, the western open range sheep industry was the original economic attraction for Basque immigrants. This engaging study tracks the development of the Basque presence in the American West, providing deep detail about the shepherders' history, native and local culture, the challenges they faced, and the changing conditions under which the Basques lived and worked. Saitua also shows how Basque immigrant shepherders went from being a marginalized labor group to a desirable, high-priced workforce in response to the constant demand for their labor power. As the twentieth century progressed, the geopolitical tide in America began to change. In 1924, the Restrictive Immigration Act resulted in a truncated labor supply from the Basque Country in Spain. During the Great Depression and the Second World War, the labor shortage became acute. In response, Senator Patrick McCarran from Nevada lobbied on behalf of his wool-growing constituency to open immigration doors for Basques, the most desirable laborers for tending sheep in remote places. Subsequently, Cold War international tensions offered opportunities for a reconciliation between the United States and Francisco Franco, despite Spain's previous sympathy with the Axis powers. This fresh portrayal shows how Basque immigrants became the backbone of the sheep industry in Nevada. It also contributes to a wider understanding of the significance of Basque immigration by exploring the role of Basque agricultural labor in the United States, the economic interests of Western ranchers, and McCarran's diplomacy as catalysts that eventually helped bring Spain into the orbit of western democracies. *Basques and Vicuñas at the Mouth of Hell* Kris Lane, 2024-11-07 In June 1622, the silver mining metropolis of Potosí, Bolivia, erupted in gangland violence, only halted three years later by a viceroy's blanket amnesty. Basque immigrants were at the center of the controversy, squaring off against nearly a dozen other nations known collectively as the *Vicuñas*. At stake were the world's richest silver mines, a means to wealth and power in the Americas, Europe, and beyond. As mines flooded and Indigenous workers died or fled, the city descended into a maelstrom of swordfights, gun battles, ambushes, sniper attacks, and summary executions. Though its roots were economic, the Basque *Vicuña* conflict strained

the sinews of Habsburg global governance even as it exposed festering local tensions only some of which were unique to Potos. This rich collection of original sources all of them archival documents housed in Bolivia Spain the United Kingdom and the United States consists of contemporary eyewitness accounts from several perspectives allowing readers to play historian. All sources have been expertly translated and carefully annotated in a manner that will engage students and scholars alike. *Basques and Vicu as at the Mouth of Hell* includes an extensive introduction seven vital documents in translation and appendices on everyday life in 1620s Potos and on the historiography of this watershed episode of colonial violence. Sustainable Food Networks: Chains of Values and Food Transitions Carolina Yacamán-Ochoa, José Luis Sánchez-Hernández, Javier Sanz-Cañada, 2025-06-12 Sustainable Food Networks SFNs are emerging as pivotal value chains for agroecological and food transitions in both urban and rural territories. These networks aim to create a healthy fair localized and inclusive food supply model standing in contrast to the dominant corporate food system characterized by long haul complex and fragile supply chains. Despite their potential SFNs such as community supported agriculture farmers

markets and urban agriculture have not been thoroughly examined through the lens of economic geography and related interdisciplinary perspectives. The current globalized food system is fraught with economic, social, and environmental issues, including the marginalization of family farming, environmental degradation, and the loss of local knowledge and biodiversity. SFNs offer a critical alternative by emphasizing small batch production, environmental sustainability, and social equity, yet there remains a significant gap in understanding their full impact and potential. This research topic aims to collate comprehensive research on Sustainable Food Networks (SFNs) with specific objectives: identifying various SFN initiatives across different territories; evaluating their spatial dimensions in global contexts; and assessing policies that can enhance the social, economic, and environmental sustainability of food value chains. Key questions include: how alternative values are propagated within SFNs; the critical spatial nodes for these values; the role of urban and peri-urban agriculture; and the interplay between territorial conditions and SFN performance. Additionally, the research seeks to understand how SFNs compete with hegemonic value chains and the potential role of public policy in strengthening these networks. To gather further insights into the complexities and potentials of SFNs, we welcome articles addressing, but not limited to, the following themes: The propagation and transfer of alternative values within SFNs; Identification of critical spatial nodes for the reproduction of these values; Roles of urban and peri-urban agriculture in SFNs; Relationships between territorial conditions, governance, and SFN performance; Strategies employed by SFNs to tackle competition from corporate value chains; The impact of SFNs on the surge of local organic and healthy food outlets; The role of public policy in supporting and strengthening SFNs.

De-Pathologizing Resistance Dimitrios Theodossopoulos, 2017-10-02 In a time of renewed interest in insurrectionary movements, urban protest, and anti-austerity indignation, the idea of resistance is regaining its relevance in social theory. *De-Pathologizing Resistance* re-examines resistance as a concept that can aid social analysis, highlighting the dangers of pathologising resistance as illogical and abnormal, or exoticising it in romanticised but patronising terms. Taking a de-pathologising and de-exoticising perspective, this book brings together insights from older and newer studies, the intellectual biographies of its contributing authors, and case studies of resistance in diverse settings such as Egypt, Greece, Israel, and Mexico. From feminist studies to plaza occupations and anti-systemic uprisings, there is an emerging need to connect the analysis of contemporary protest movements under a broader theoretical re-examination. The idea of resistance, with all of its contradictions and its dynamism, provides such a challenging opportunity. This book was originally published as a special issue of *History and Anthropology*.

The Oxford Handbook of Language and Society Ofelia García, Nelson Flores (Linguist), Massimiliano Spotti, 2017 This book challenges basic concepts that have informed the study of sociolinguistics. accounts from a broad range of regional contexts the collection takes stock of such terms as polylingualism metrolingualism and translanguaging to question perceptions around multilingual and monolingual language use The book critiques the status of fluid language use as a more natural language practice and in turn its greater potential for corresponding social transformation demonstrating the value of linguistic fixity and the continuous debate between fixity and fluidity in multilingual speakers lives In providing these accounts the book seeks not to advocate for linguistic fixity or fluidity but to argue that sociolinguists pay close attention to the way both types of linguistic practice open up or close down avenues for social transformation This collection is a key reading for graduate students and scholars in sociolinguistics multilingualism and linguistic anthropology
