Molecular Materials with Specific Interactions - Modeling and Design W. Andrzej Sokalski,2007-05-06 Molecular Materials with Specific Interactions Modeling and Design has a very interdisciplinary character and is intended to provide basic information as well as the details of theory and examples of its application to experimentalists and theoreticians interested in modeling molecular properties and putting into practice rational design of new materials One of the first requirements to initiate the molecular modeling of molecular materials is an accurate and realistic description of the electronic structure intermolecular interactions and chemical reactions at microscopic and macroscopic scale Therefore the first four chapters contain an extensive introduction into the latest theories of intermolecular interactions functional density techniques microscopic and mezosopic modeling techniques as well as first principle molecular dynamics In the following

chapters techniques bridging microscopic and mezosopic modeling scales are presented The authors then illustrate various successful applications of molecular design of new materials drugs biocatalysts etc before presenting challenging topics in molecular materials design

Bockris, Amulya K.N. Reddy, 1998-06-30 This book had its nucleus in some lectures given by one of us J O M B in a course on electrochemistry to students of energy conversion at the University of Pennsylvania It was there that he met a number of people trained in chemistry physics biology metallurgy and materials science all of whom wanted to know something about electrochemistry The concept of writing a book about electrochemistry which could be understood by people with very varied backgrounds was thereby engendered The lectures were recorded and written up by Dr Klaus Muller as a 293 page manuscript At a later stage A K N R joined the effort it was decided to make a fresh start and to write a much more comprehensive text Of methods for direct energy conversion the electrochemical one is the most advanced and seems

the most likely to become of considerable practical importance Thus conversion to electrochemically powered transportation systems appears to be an important step by means of which the difficulties of air pollution and the effects of an increasing concentration in the atmosphere of carbon dioxide may be met Cor sion is recognized as having an electrochemical basis The synthesis of nylon now contains an important electrochemical stage Some central biological mechanisms have been shown to take place by means of electrochemical reactions A number of American organizations have recently recommended greatly increased activity in training and research in electrochemistry at universities in the United States
