

Introduction

PEG: A Three-Item Scale Assessing Pain Intensity and Interference

1. Pain Level on Average Past Week

1. What number best describes your pain on average in the past week?

2. How Pain has Interfered

What number best describes how, during the past week, pain has interfered with your enjoyment of life?

3. How Pain Interfered with General Activities

What number best describes how, during the past week, pain has interfered with your general activities?

Computing the PEG Score

To compute the PEG score, add the 3 responses to the questions above, then divide by 3 to get a final score out of 10.

The final PEG score can mean very different things to different patients. The PEG score, like most other screening instruments, is most useful in tracking changes over time. The PEG score should decrease over time after therapy has begun.
