Shackel, 2014-05-21 Since the first INTERACT Conference in September 1984 the field of Human Computer Interaction has received increasing attention from researchers and industrial practitioners the importance of the topic now being widely recognized. The INTERACT forums provide the opportunity for regular presentation and discussion of new results from research and application by bringing together the various disciplines and research approaches on a worldwide basis. *Art in Chicago* Maggie Taft, Robert Cozzolino, 2018-10-24 For decades now the story of art in America has been dominated by New York. It gets the majority of attention the stories of its schools and movements and masterpieces the stuff of pop culture legend. Chicago on the other hand well people here just get on with the work of making art. Now that art is getting its due *Art in Chicago* is a magisterial account of the long history of Chicago art from the rupture of the Great Fire in 1871 to the present. Manierre Dawson, László Moholy-Nagy and Ivan Albright to Chris Ware, Anne Wilson and Theaster Gates. The first single volume history of art and artists in Chicago the book in recognition of the complexity of the story it tells doesn't follow a single continuous trajectory. Rather it presents an overlapping sequence of interrelated narratives that together tell a full and nuanced yet wholly accessible history of visual art in the city. From the temptingly blank canvas left by the Fire we loop back to the 1830s and on up through the 1860s tracing the beginnings of the city's institutional and professional art world and community. From there we travel in chronological order through the decades to the present. Familiar developments such as the founding of the Art Institute, the Armory Show and the arrival of the Bauhaus are given a fresh look while less well known aspects of the story like the contributions of African American artists dating back to the 1860s or the long history of activist art finally get suitable recognition. The six chapters each written by an expert in the period brilliantly mix narrative and image weaving in oral histories from artists and critics reflecting on their work in the

city and setting new movements and key works in historical context The final chapter comprised of interviews and conversations with contemporary artists brings the story up to the present offering a look at the vibrant art being created in the city now and addressing ongoing debates about what it means to identify as or resist identifying as a Chicago artist today The result is an unprecedentedly inclusive and rich tapestry one that reveals Chicago art in all its variety and vigor and one that will surprise and enlighten even the most dedicated fan of the city's artistic heritage Part of the Terra Foundation for American Art's year long Art Design Chicago initiative which will bring major arts events to venues throughout Chicago in 2018 Art in Chicago is a landmark publication a book that will be the standard account of Chicago art for decades to come No art fan regardless of their city will want to miss it Logics in Artificial Intelligence Eduardo Fermé,Joao Leite,2014-09-16 This book constitutes the proceedings of the 14th European Conference on Logics in Artificial Intelligence JELIA 2014 held in Funchal Madeira Portugal in September 2014 The 35 full papers and 14 short papers included in this volume were carefully reviewed and selected from 121 submissions They are organized in topical sections named description logics automated reasoning logics for uncertain reasoning non classical logics answer set programming belief revision dealing with inconsistency in ASP and DL reason about actions and causality system descriptions short system descriptions and short papers The book also contains 4 full paper invited talks *Knowledge, Information and Creativity Support Systems* Susumu Kunifuji,George Angelos Papadopoulos,Andrzej M.J.
