You are caring for a child who was resuscitated after a drowning event. The child is intubated & ventilated with 100% oxygen with equal breath sounds & exhaled CO₂ detected. The HR is slow & the monitor shows sinus bradycardia. The skin is cool, mottled, & moist; distal pulses are not palpable & the central pulses are weak. Intravenous access has been established. The core temperature is 37.3°C. Based on the PALS bradycardia algorithm, which of the following should be provided first?

☒ Epinephrine IV

You are caring for a 5 yo patient with SVT. The child is lethargic. The skin is pale & cool with delayed capillary refill. Distal pulses are not palpable. Which of the following would be the best treatment to provide without delay? ☒ Provide synchronized cardioversion at 0.5 to 1 J/kg

You are initiating treatment for a child with septic shock & hypotension. While administering high-flow oxygen you determine that the child's respirations are adequate & SpO₂ is 100%. You have just established vascular access & obtained blood samples. Which of the following is the next most appropriate therapy to support systemic perfusion? ☒ Administer repeated fluid boluses of isotonic crystalloid

You are treating an 8 yo with ventricular tachycardia with pulses & adequate perfusion. You attempted synchronized cardioversion without success. While seeking expert consultation, it would be most appropriate to: ☒ Consider possible metabolic & toxicologic causes

You are caring for a 2 yo unconscious pt who is intubated & receiving mechanical ventilation. The child's HR suddenly drops to 40/min & his color becomes mottled. You should respond to these changes by: ☒ Using a resuscitation bag provide manual ventilation with 100% oxygen

You are caring for a 9 mo pt with pronounced respiratory distress. You initiated high-flow oxygen using a nonrebreathing mask about 10 minutes ago & established IV access. Initially the infant's HR was in the 150/min range with strong pulses. Suddenly the infant's respiratory rate falls to 6/min with significant intercostal retractions, & little air movement is heard. The infant becomes cyanotic & the HR decreases to 95/min. Which of the following treatments would be best for you to provide now? ☒ Provide BMV

Which of the following is likely to be the most helpful technique to ID potentially reversible metabolic & toxic causes during the attempted resuscitation of a young child in cardiac arrest? ☒ Soliciting a history from the caregiver or family

You are caring for a pt who developed a tension pneumothorax after several hours of positive-pressure ventilation. Which of the following would be the most appropriate site for needle decompression? ☒ Over the third rib at the midclavicular line

You attempted synchronized cardioversion for an infant with SVT & poor perfusion. The SVT persists after the initial 1 J/kg shock. Which of the following should you attempt now? ☒ Synchronized cardioversion at a dose of 2 J/kg

Servant Leadership: Research and Practice Selladurai, Raj, Carraher, Shawn, 2014-03-31 Leaders represent a necessary part of any organizational structure and leadership styles can vary greatly between individuals. Servant leadership is one such leadership style which is helping individuals guide and encourage others within their organization. Servant Leadership Research and Practice explores the concept of rethinking the leader-subordinate relationship structure through the dissolution of an authoritarian leadership style. This book supports current and future leaders through relevant discussions on methodologies and tools in support of servant leadership and is designed for use by business managers, executives, scholars, and upper-level students.

Internet Based Learning Deanie French, 1999 This book is for every teacher or trainer whose computer skills may be limited who wants to understand the Internet educationally and use it in his or her courses. As institutional pressures mount to integrate the Internet into teaching, this book provides a framework and a hands-on introduction to what's involved, whether it's adapting materials and teaching styles for the Web or designing a virtual course. This book provides an introduction to the key educational concepts needed to adapt teaching methods and materials to the medium of the Internet, an introduction to both basic and advanced Internet skills from using e-mail to collaborative conferencing, a framework for harnessing the Internet to achieve educational goals and successfully exploiting its resources, features and applications to promote effective learning. The framework starts from the premise that teachers should progressively apply Internet technology as their skills and confidence develop. It develops the concept of augmented teaching styles supplementing traditional teaching with Internet-based options, demonstrates how to use modules as the building blocks for Web-based learning, and shows how to use the Internet to deliver individualized learning by enhancing personal communication between teacher and student and addressing the diversity of learning styles. The book abounds with inspiring and thought-provoking examples of Internet course materials developed by a wide variety of teachers and trainers, including modules and forms created by the authors who have extensive experience in delivering Internet-based courses. A glossary of terms and directory of Internet sites and resources complete the book, which is also supported by a related Web site.
