Neal, 2018-05-14 Derek Neal writes that economists must analyze public education policy in the same way they analyze other procurement problems He shows how standard tools from economics research speak directly to issues in education For mastering the models and tools that economists of education should use in their work there is no better resource available Promoting the Educational Success of Children

and Youth Learning English National Academies of Sciences, Engineering, and Medicine, Health and Medicine Division, Division of Behavioral and Social Sciences and Education, Board on Science Education, Board on Children, Youth, and Families, Committee on Fostering School Success for English Learners: Toward New Directions in Policy, Practice, and Research, 2017-08-25 Educating dual language learners DLLs and English learners ELs effectively is a national challenge with consequences both for individuals and for American society. Despite their linguistic cognitive and social potential, many ELs who account for more than 9 percent of enrollment in grades K-12 in U.S. schools are struggling to meet the requirements for academic success and their prospects for success in postsecondary education and in the workforce are jeopardized as a result. Promoting the Educational Success of Children and Youth Learning English: Promising Futures examines how evidence based on research relevant to the development of DLLs/ELs from birth to age 21 can inform education and health policies and related practices that can result in better educational outcomes. This report makes recommendations for policy practice and research and data collection focused on addressing the challenges in caring for and educating DLLs/ELs from birth to grade 12.

Advocating for Sociolinguistic Justice in the United States Michelle F. Ramos Pellicia, Patricia MacGregor-Mendoza, Mercedes Niño-Murcia, 2024-10-01 This collection focuses on social awareness and critical language awareness with the goal of enlightening and empowering multilingual and multicultural communities across the U.S. Each chapter brings to light the trauma gaps in services and misguided societal perceptions that adversely impact communities whose linguistic and cultural background and/or status as migrants place them in vulnerable situations. In doing so, the authors and editors demonstrate how an increased awareness of diverse communities' linguistic and cultural wealth can be leveraged to build strength and resilience in order to overcome physical, verbal, or symbolic violence and provide remedies for inequities in educational, medical, and legal contexts. Showcasing discussions of the intersectionality and contexts in which language, power, migration, and the cultural funds of knowledge of minoritized communities interact, this volume will be of interest to students, scholars, and educators in sociolinguistics, applied linguistics, and language education.
