

# Biology Summary Book

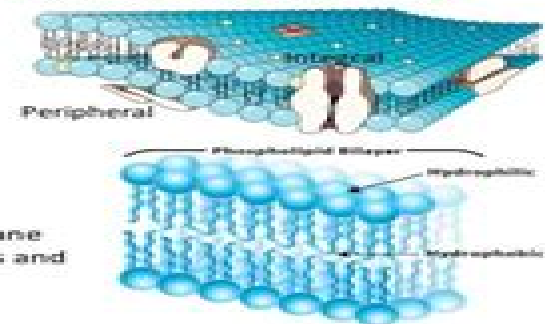

## Unit 3: How do cells maintain life?

### Area of Study 1: How do cellular processes work?

#### Key Knowledge:

- The fluid mosaic model of the structure of the plasma membrane and the movement of hydrophilic and hydrophobic substances across it based on their size and polarity
- The role of different organelles including ribosomes, endoplasmic reticulum, Golgi apparatus and associated vesicles in the export of a protein product from the cell through exocytosis
- Cellular engulfment of material via endocytosis
- Protein functional diversity and the nature of the proteome
- The functional importance of the four hierarchical levels of protein structure
- The synthesis of a polypeptide chain from amino acid monomers by condensation polymerisation

- The Plasma Membrane
  - Makes the barrier of a cell
  - Controls everything that comes in and out of a cell
- The Fluid Mosaic Model
  - Aquaporins allow water to travel through
- Membrane Structure
  - Stabilised by glycoproteins and glycolipids
  - Cholesterol
    - Fluidity and rigidity which creates a stable membrane
    - Restricts movement of the phospholipid molecules and prevents them from packing too close together
    - Prevent solidification at lower temperatures
- Membrane Proteins

| Integral Proteins                             | Peripheral Proteins                                                                                                     |
|-----------------------------------------------|-------------------------------------------------------------------------------------------------------------------------|
| Permanent part of the plasma membrane         | Not embedded in the bilayer                                                                                             |
| Have both hydrophilic and hydrophobic regions | Acts as receptors and recognition sites.<br>Can be attached to either phospholipid molecules or other integral proteins |

#### ➤ Types of Membrane Proteins

| Type               | Function                                                                                         |
|--------------------|--------------------------------------------------------------------------------------------------|
| Transport proteins | Two types: channel and carrier, they allow some substances typically ions to move through        |
| Receptor proteins  | Hormones and other substances bind to these – affects cells activities. (insulin and adrenaline) |
| Glycoproteins      | Acts as markers 'antigens', enables immune system to distinguish self from non- self             |

- Factors that Alter the Fluidity of the Plasma Membrane
  - Phospholipid composition and structure
  - Temperature
    - Higher temperatures causes fluidity of the membrane

# Part 3 Biology Unit 05 Lesson 01 Worksheet

**Guillaume Favre**

A red circular graphic with a gradient, appearing as a partial circle or a thick curved line, located to the right of the name bar.

**Part 3 Biology Unit 05 Lesson 01 Worksheet:**

Eventually, you will very discover a further experience and endowment by spending more cash. nevertheless when? reach you say you will that you require to acquire those every needs next having significantly cash? Why dont you attempt to acquire something basic in the beginning? Thats something that will guide you to understand even more regarding the globe, experience, some places, gone history, amusement, and a lot more?

It is your extremely own get older to put on an act reviewing habit. accompanied by guides you could enjoy now is **Part 3 Biology Unit 05 Lesson 01 Worksheet** below.
