Physical Science Scope Grade 11 November 2014:

Pursuing quality education in Physical and Rehabilitation Medicine Francesca Gimigliano, Maria Gabriella Ceravolo, Jorge Lains, 2023-08-15 High quality rehabilitation care represents a constitutive element of health systems worldwide The harmonization of staff education both at the undergraduate and postgraduate level is a key element for ensuring the highest standard of rehabilitation care International bodies like the UEMS Board for Physical and Rehabilitation Medicine PRM or the International Society for PRM have already delivered regulatory documents setting standards in postgraduate PRM education The implementation of such rules is to be validated worldwide with special attention to low and middle income countries This Research Topic aims to stimulate awareness in the scientific community especially for those involved in postgraduate education and policy making decisions It will highlight the need for developing competency based education as a powerful mechanism to align education and training with health system priorities This holds particular value for resource limited countries where the knowledge and skills of rehabilitation doctors need to reflect not only the population's health profile but also the strengths and weaknesses e.g. workforce gaps and maldistributions of the health system This goal can be achieved through sharing experiences between those who have engaged themselves in the process of program development curriculum design and competency based education in rehabilitation Over the last 25 years the number of papers addressing the issue of residency education in PRM has exponentially increased testifying the interest towards the role of rehabilitation and more specifically of the PRM doctors as leaders of the rehabilitation team

Applied Health Economics for Public Health Practice and Research Rhiannon Tudor Edwards, Emma McIntosh, 2019-03-14 In today's world of scarce resources determining the optimal allocation of funds to preventive health care interventions PHIs is a challenge The upfront investments needed must be viewed as long term projects the benefits of which we will experience in the future The long term positive change to PHIs from economic investment can be seen across multiple sectors such as health care education employment and beyond Applied Health Economics for Public Health Practice and Research is the fifth in the series of Handbooks in Health Economic Evaluation It presents new research on health economics methodology and application to the evaluation of public health interventions Looking at traditional as well as novel methods of economic evaluation the book covers the history of economics of public health and the economic rationale for government investment in prevention In addition it looks at principles of health economics evidence synthesis key methods of economic evaluation with accompanying case studies and much more Looking to the future Applied Health Economics for Public Health Practice and Research presents priorities for research in the field of public health economics It acknowledges the role played by natural environment in promoting better health and the place of genetics environment and socioeconomic status in determining population health Ideal for health economists public health researchers local government workers health care professionals and those responsible for health policy development Applied Health Economics for Public Health Practice and

Research is an important contribution to the economic discussion of public health and resource allocation *Lifespan Development* Michele Hoffnung, Robert J. Hoffnung, Kelvin L.
