

A dramatic black and white photograph of a space shuttle launching. The shuttle is on the left, angled upwards, with a massive, bright white plume of fire and smoke trailing behind it. The background is a dark, cloudy sky, with the clouds illuminated from below, creating a high-contrast, textured appearance. The overall mood is one of power and scientific achievement.

Divine energies in twentieth century Orthodox theology and offers new insights about the key contributions of key theologians such as Sergius Bulgakov George Florovsky John Meyendorff Christos Yannaras and Thomas Torrance Where do the understandings of energy in theology and physics meet The author argues that the encounter between theology and physics happens at the level of quantum physics where the subtle use of words and language acquires a distinctive apophatic dimension His comparative approach focuses on the epistemological struggles of theologians and physicists According to Tanev this focus on the struggles of knowing offers a new way to look at the dialogue between science and theology
