## References

- A circuit in which all charge follows a single pathway is a **series** circuit; a circuit in which charge follows multiple pathways is a **parallel** circuit.  
a. series, parallel                      b. parallel, series
- For a parallel circuit: as the number of resistors being used within the same parallel circuit increases, the overall resistance value decreases (increases, decreases) and the overall current value increases (increases, decreases).
- Household circuits are connected in parallel so that B. Select all that apply.  
a. houses get the same effect with less current and thus save on energy costs  
**b. the turning off of one appliance does not result in the shut down of others**  
c. the hazard of electrocution and overheating of circuits is avoided

### Water Analogy:

4. When the water flow (or charge flow) is divided into two or more separate pathways (as in a parallel circuit) the sum of the current in each individual pathway equals the total current. Utilize this principle to fill in the blanks in the following two diagrams. The meters in the diagram are measuring water flow rates in gallons per minute ("gpm").

5. Apply the same principle to fill in the blanks in the following diagrams for charge flow (i.e., current) through a parallel circuit.

Movement into academic science technology engineering and mathematics STEM fields has been slow for women and minorities Not only are women and minorities underrepresented in STEM careers there is strong evidence that many academic departments are resistant to addressing the concerns that keep them from entering careers in these fields In light of recent controversies

surrounding these issues this volume examining reasons for the persistence of barriers that block the full participation and advancement of underrepresented groups in the sciences and addressing how academic departments and universities can remedy the situation is particularly timely As a whole the volume shows positive examples of institutions and departments that have been transformed by the inclusion of women and recommends a set of best practices for continuing growth in positive directions
