Feminist Theories of Crime Merry Morash,2017-07-05 This collection re imagines the field of criminology with insights gleaned from feminist theory Works included here illustrate that gender is a key organizing principle of social life This means that men and women have gender that patriarchy as well as gender must be theorized and that other systems of oppression such as race and class must also be studied to fully understand the crime problem and the criminal justice system Finally the articles collected here exemplify the feminist concern for thinking consciously about how and why we do our research with the crucial goal of producing knowledge that will promote social justice *Creating Criminals* Vivien Stern,2013-07-18 Market society is producing more crime around the world More acts are being defined as crimes Ever increasing numbers of people are classified as criminals and more are being locked up in prison With globalization the crime and punishment

problem is no longer insulated from pressures beyond national borders The rich may retreat behind their expensive security into gated communities but the poor are more and more at the mercy of criminals and corrupt policing Yet Vivien Stern argues the trends towards more criminalization and more imprisonment are not making for more effective crime control or safer communities This important book demonstrates that the prospects for the future are serious unless NGOs and reformers join in a new movement for reform that gives more control of justice policy back to communities and neighbourhoods

Electronically Monitored Punishment Mike Nellis, Kristel Beyens, Dan Kaminski, 2013-05-07 Electronic monitoring EM is a way of supervising offenders in the community whilst they are on bail serving a community sentence or after release from prison Various technologies can be used including voice verification GPS satellite tracking and most commonly the use of radio frequency to monitor house arrest It originated in the USA in the 1980s and has spread to over 30 countries since then This book explores the development of EM in a number of countries to give some indication of the diverse ways it has been utilized and of the complex politics which surrounds its use A techno utopian impulse underpins the origins of EM and has remained latent in its subsequent development elsewhere in the world despite recognition that it is less capable of effecting penal transformations than its champions have hoped This book devotes substantive chapters to the issues of privatisation evaluation offender perspectives and ethics Whilst normatively more committed to the Swedish model the book acknowledges that this may not represent the future of EM whose untrammelled commercially driven development could have very alarming consequences for criminal justice Both utopian and dystopian hopes have been invested in EM but research on its impact is ambivalent and fragmented and EM remains undertheorised empirically and ethically This book seeks to redress this by providing academics policy audiences and practitioners with the intellectual resources to understand and address the challenges which EM poses

Private Prisons and Public Accountability Richard Harding, 2018-04-27 Private prisons have become an integral part of the penal system in the United States the United Kingdom and Australia There already are over 100 such prisons in these countries and with the number of prisoners continuing to increase rapidly the trend toward privatization seems irreversible In this context Richard Harding addresses the following issues the contributions positive or negative that private prisons make to providing custody for offenders whether or not private prisons stimulate improvement within the public prison system and the difficulties with the regulation and accountability of private

prisons This book sets out to explore the contribution of private prisons to custodial practices standards and objectives Many experts believe that properly regulated and fully accountable private prisons could lead to improvement within the public prison system which has long been degenerate and demoralized Harding sees the total prison system as a single entity with two components public and private He relies upon extensive fieldwork and draws upon published literature as well as in house documentation discussions with public and private authorities and a range of government documents Key issues covered in Private Prisons and Public Accountability are overcrowding program delivery prisoners rights quality of staff and financial control This volume will be a significant addition to the criminal justice literature but it will also appeal to sociologists policymakers and scholars interested in the privatization of various institutions in our society *Feudal America* Vladimir Shlapentokh, Joshua Woods, 2011-01-17 Do Americans live in a liberal capitalist society where evenhanded competition rules the day or a society in which big money private security and personal relations determine key social outcomes Vladimir Shlapentokh and Joshua Woods argue that the answer to these questions cannot be found among the conventional models used to describe the nation Offering a new analytical tool the authors present a provocative explanation of the nature of contemporary society by comparing its essential characteristics to those of medieval European societies Their feudal model emphasizes five elements the weakness of the state and its inability to protect its territory guarantee the security of its citizens and enforce laws conflicts and collusions between and within organizations that involve corruption and other forms of illegal or semilegal actions the dominance of personal relations in political and economic life the prevalence of an elitist ideology and the use of private agents and organizations for the provision of safety and security *Feudal America* urges readers to suspend their forward thinking and futurist orientations question linear notions of social and historical progression and look for explanations of contemporary social problems in medieval European history Expulsions Saskia Sassen, 2014-05-05 Income inequality displaced and imprisoned populations destruction of land and water today s dislocations cannot be understood in the usual terms of poverty and injustice Saskia Sassen argues They are more accurately understood as expulsions from professional livelihood from living space from the very biosphere that makes life possible
