

Hospital Management Information System

Introduction

The essential utilization of the hospital management information system is to oversee and deal with Health Care Management. The Health Care Information system has brought up hospital staff, patient's, nurses, attendants and doctors to add all resources and data anywhere and anytime.

The proficient and progressed hospital information system has numerous extraordinary highlights, and underneath are some of them you need to search for while picking a hospital information system/software for your medical and healthcare needs. The hospital management information system(HMIS) works online appointments for specialists and it deals with payment records of patients.

Terminology

Payroll- Payroll is the total of all compensation of duty must pay to its employees for a set period of time or on a given date.

Roaster management- it is the process of managing employee shift assignments, working hours and leave.

EHR- Electronic health record is an electronic version of a patient's medical history.

Fragmentation – the storing of a file in several separate areas of memory scattered throughout a hard disk.
