In the above mentioned diagram the timing of new project of WH Smith has been described the total activity will be of 25 days and here are many procedures but the company will take the most appropriate one. The company need to renovate the store to show case the products to grab more customer attention. According to the plans the organisation need to make planning the things like store rooms, customer galleries to sit and read books, have been included in the store that will make the customer comfortable to visit and shop for their books. CPA is basically known as network analysis. The original CPM program and its approach are no longer used. The critical path analysis can be applied to any approach used to analyze a project network logic diagram. CPA is known as the network analysis. A network consists of two things- nodes and arrow. WH Smith used this technique to judge the cost effectiveness, profitability, raw material wastage etc.

3.4. Quality and its maintenance:

In case any type product quality is the main parameter by which a customer judges the efficiency of it. The more the expectation and perception of the customer is matched the quality the product will generate. The more qualitative product will meet the expectation of the customers. In case of WH Smith the quality of the products depends upon many a thing that is the page quality, writing quality and the stationery quality and uniqueness of the products.

Quality of a product can be maintained by total quality management which focuses on customer requirements, specification of product, quality output, and control in production cost (Kelemen, 2009). Company have to keep in mind the consumers needs, have to deal with new technology, maintain the prices of their product. In case of WH Smith the product and after sales service need to be reviewed all the time. They also need to have a well set of writers who will provide the best quality of books. The newspaper should contain of the most trending news.

Product And Service Operations Management Assignment Sample:

The Operations Management Complete Toolbox (Collection) Randal Wilson, Arthur V. Hill, 2013-08-08 For operations managers running a smooth and efficient organization is more crucial than ever and it's more difficult too. Fortunately, there's a secret to success: a proven approach and toolset that can help operations managers free up resources, eliminate unnecessary meetings, and get more done faster. The approach is named The Power of Completion, and the tools have been honed by expert project managers through decades of experience. In *The Operations Manager's Toolbox*, operations manager and PMP certified project manager Randal Wilson shows how to apply the Project Management (PM) discipline to completing the crucial smaller tasks that can help the organization quickly drive substantial improvements in efficiency and performance. *The Encyclopedia of Operations Management* is the perfect field manual for every supply chain or operations management practitioner and student. The field's only single volume reference, it's uniquely convenient and uniquely affordable. With nearly 1,500 well-organized definitions, it can help students quickly map all areas of operations and supply chain management and prepare for case discussions, exams, and job interviews. For instructors, it serves as an invaluable desk reference and teaching aid that goes far beyond typical dictionaries. For working managers, it offers a shared language with insights for improving any process and supporting any training program. It thoroughly covers accounting, customer service, distribution, e-business, economics, finance, forecasting, human resources, industrial engineering, industrial relations, inventory management, healthcare management, Lean Sigma Six Sigma, lean thinking, logistics, maintenance, engineering management, information systems, marketing, sales, new product development, operations research, organizational behavior, management, personal time management, production planning and control, purchasing, reliability engineering, quality management, service management, simulation, statistics, strategic management, systems engineering, supply and supply chain management, theory of constraints, transportation, and warehousing. Multiple figures, graphs, equations, Excel formulas, VBA scripts, and references support both learning and application.
