Performance and Social Progress Keith G. Banting,Andrew Sharpe,France St-Hilaire,2001 The chapters in this volume provide experts views of specific dimensions of the economic social developments in Canada during the 1990s The chapters are organized into four sections dealing with basic concepts the public view of economic social trends changes in key public policies and outcomes in terms of the economic social environmental record of the 1990s Specific topics covered include the concept of social progress defining measuring social progress monetary policy the relationship between social capital the economy unemployment deficit elimination fiscal policy trade liberalization income security policy income distribution labour market outcomes child well being and economic growth environmental degradation Public Procurement and the EU

Competition Rules Albert Sánchez Graells,2011-01-29 Shortlisted for the 2012 Prix Vogel in Economic Law Public procurement and competition law are both important fields of EU law and policy intimately intertwined in the creation of the internal market Hitherto their close connection has been noted but not closely examined This new work is the most comprehensive attempt to date to explain the many ways in which these fields often considered independent of one another

interact and overlap in the creation of the internal market In this process of convergence between competition and public procurement law the need for this joint study is clearly apparent As such the book asks whether competition law principles inform or condition public procurement rules and whether they are adequate to ensure that competition is not distorted in markets where public procurement is particularly significant The book moves away from the classical focus of public procurement on the activities of private actors developing instead an analytical framework for the appraisal of the market behaviour of the public buyer from a competition perspective The analysis is both legal and economic Proceeding through a careful assessment of the general rules of competition and public procurement the book constantly tests the efficacy of the rules in competition and public procurement against a standard of the proper functioning of undistorted competition in the market for public procurement
