Fortunately you can influence your inflammation levels to some extent Diet also plays a part and some experts contend that altering your diet to include less inflammatory foods and beverages may be preferable to relying only on medication to reduce inflammation It may also be a blessing to only use pharmaceutical painkillers when necessary since many have terrible side effects including fuzziness memory loss and tiredness Because they lack practice beginners in any endeavor often make blunders However errors may be useful particularly if you store them in your body Therefore everyone just beginning this diet needs a manual plan for novices Let s talk in depth about these issues *Moufflet* Kelly
