#### Indian based *Bambrew* is helping to put an end to single-use plastic straws

For Vaibhav Anant to see a tortoise struggling in pain because it was caught up in plastic waste, was a difficult sight to witness. Plastic waste, including plastic straws, is accumulating in lakes and oceans, becoming a global crisis. Anant used product innovation to help tackle this problem and formed his business *Bambrew*.

5

After researching for over a year and a half for materials that do not harm the environment, Vaibhav Anant found that bamboo was the best alternative material to plastic to make straws. Bamboo is available in high quantities in India. *Bambrew* developed a technology for making straws from bamboo fibres and bamboo waste. These materials are natural and biodegradable which means the products can decay naturally and do not have a negative impact on the environment.

10

Secondary research helped him to collect quantitative data. He found that there are about 137 bamboo species, but not all of them are suitable for making straws. He researched the best areas in India to source the bamboo and identified communities in India who could manufacture the straws.

15

*Bambrew* is now developing disposable bamboo food containers and packaging as well as straws and exporting these to the US, UK, and Canada. The marketing strategy used by *Bambrew* is business to business (B2B). Customers include *Zomato*, a food delivery business, and *Lalit Hotels*, a luxury hotel chain.

According to reports, the global biodegradable packaging market, which was valued at \$3.92bn in 2018, will be worth \$21bn by 2025.
