the driving forces that will help make it better

## **Molecular Markers and Targeted Therapy for Hepatobiliary**

**Tumors, volume I.** Yunfei Xu, Zongli Zhang, Hongda Liu, Xuesong Gu, 2024-07-26 Hepatobiliary tumor mainly including hepatocellular carcinoma, cholangiocarcinoma, and gallbladder cancer is a group of highly aggressive malignancies. Hepatocellular carcinoma, cholangiocarcinoma, and gallbladder cancer have different biological characters, histopathological traits, and treatment strategies but have similar clinical features such as silent early symptom and extremely poor prognosis. The diagnostic, predictive, or prognostic tumor biomarkers of hepatobiliary cancers are in unmet need. In contrast to the poor outcome, the treatment options for hepatobiliary cancers are very limited. It is still controversial about the effects of chemotherapy and radiotherapy for hepatobiliary cancer. FDA-approved targeted drugs are only Sorafenib and Lenvatinib for hepatocellular carcinoma and Pemigatinib for cholangiocarcinoma. Unfortunately, these drugs are only effective for 5%–30% of patients. Therefore, more attention should be called upon investigating effective biomarkers and drug targets, stratifying high-risk patients, guiding precise treatments, and developing therapeutic strategies for hepatobiliary cancers. This Research Topic aims at discussing the current knowledge and proceedings of diagnostic, predictive, and prognostic tumor biomarkers in hepatobiliary cancer and presenting the recent advances on new drug targets and potential targeted therapies for hepatobiliary cancer. We welcome submissions of Review, Mini Review, Clinical Trial, and Original Research articles covering but not limited to the following topics: 1. new diagnostic, prognostic factors, biomarkers, and/or risk factors in hepatobiliary tumors; 2. new drug targets and oncogenic or tumor suppressive molecular mechanism of the novel targets; 3. new intervention or targeted therapy in hepatobiliary tumors; 4. new findings of bioinformatics or high-throughput methods such as mass spectrometry and genome-wide association studies or which may help screen the potential biomarkers of hepatobiliary tumors; 5. clinical studies such as cohort study or RCT to identify new risks or treatment therapies in hepatobiliary tumors; 6. basic pharmacological, preclinical, or clinical study of potential drugs targeting hepatobiliary tumors. Please note: manuscripts consisting solely of bioinformatics or computational analysis of public genomic or transcriptomic databases which are not accompanied by validation independent cohort or biological validation in vitro or in vivo are out of scope for this section and will not be accepted as part of this Research Topic.

If you ally habit such a referred **Saab 9manual Repair M 9** books that will manage to pay for you worth, acquire the very best seller from us currently from several preferred authors. If you want to witty books, lots of novels, tale, jokes, and more fictions collections are afterward launched, from best seller to one of the most current released.

You may not be perplexed to enjoy all ebook collections Saab 9manual Repair M 9 that we will completely offer. It is not all but the costs. Its just about what you infatuation currently. This Saab 9manual Repair M 9, as one of the most lively sellers here will categorically be in the midst of the best options to review.
