Dildy,Warren Thompson,2013-05-20 As the routed North Korean People s Army NKPA withdrew into the mountainous reaches of their country and the People s Republic of China PRC funneled in its massive infantry formations in preparation for a momentous counter offensive both lacked adequate air power to challenge US and UN Reluctantly Josef Stalin agreed to provide the requisite air cover introducing the superior swept wing MiG 15 to counter the American s straight wing F 80 jets This in turn prompted the USAF to deploy its very best the F 86A Sabre to counter this threat Thus began a two and a half year struggle in the skies known as MiG Alley In this period the unrelenting campaign for aerial superiority witnessed the introduction of successive models of these two revolutionary jets into combat This meticulously researched study not only provides technical descriptions of the two types and their improved variants complete with a fighter pilot s assessment of these aircraft but also chronicles the entire scope of their aerial duel in MiG Alley by employing the recollections of the surviving combatants including Russian Chinese and North Korean pilots who participated **The Card Players' Manual. Comprising Whist, Loo, and Cribbage, ... and All the Round Games** Rawdon Crawley (Captain, pseud. [i.e. George Frederick Pardon.]),1876 Tiger Check Steven A. Fino,2017-11-01 How did American fighter pilots respond to the challenges posed by increasing automation Spurred by their commanders during the Korean War to be tigers aggressive and tenacious American fighter pilots charged headlong into packs of fireball spewing enemy MiGs relying on their keen eyesight piloting finesse and steady trigger fingers to achieve victory But by the 1980s American fighter pilots vanquished their foes by focusing on a four inch

square cockpit display manipulating electromagnetic waves and launching rocket propelled guided missiles from miles away In this new era of automated long range air combat can fighter pilots still be considered tigers Aimed at scholars of technology and airpower aficionados alike Steven A Fino s Tiger Check offers a detailed study of air to air combat focusing on three of the US Air Force s most famed aircraft the F 86E Sabre the F 4C Phantom II and the F 15A Eagle Fino argues that increasing fire control automation altered what fighter pilots actually did during air to air combat Drawing on an array of sources as well as his own decade of experience as an F 15C fighter pilot Fino unpacks not just the technological black box of fighter fire control equipment but also fighter pilots attitudes toward their profession and their evolving aircraft He describes how pilots grappled with the new technologies acutely aware that the very systems that promised to simplify their jobs while increasing their lethality in the air also threatened to rob them of the quintessential albeit mythic fighter pilot experience Finally Fino explains that these new systems often required new unique skills that took time for the pilots to identify and then develop Eschewing the typical great machine or great pilot perspectives that dominate aviation historiography Tiger Check provides a richer perspective on humans and machines working and evolving together in the air The book illuminates the complex interactions between human and machine that accompany advancing automation in the workplace
