smartphone in the S line which lost the 3.5 mm jack but received support for eSIM built in SIM card. Also for the first time in many years the company changed the matrix of its cameras to a new sensor from Sony the IMX555 model. And of course this is the first time a new display with a refresh rate of 120 Hz is used. I disagree with those who don't see much change in the Galaxy S20 over previous models. These differences exist and they are quite serious. Rather the question is different isn't the new model a step forward and two steps back? There is a lot of criticism on the web about new products especially the Galaxy S20 Ultra. You will learn from our book Samsung S20 S20 Plus and S20 Ultra Everything you need to know about the newest smartphone.
