

Centricity Perioperative PACU Documentation

Centricity Perioperative PACU Documentation offers a robust documentation component that helps provide enhanced efficiency for nursing clinical documentation. With the use of touch-screen data entry, users may vary content by patient population, Phase of Care, data capture of monitoring devices, and seamless access of intraoperative data. Knowing that anesthesia care doesn't end in the OR but continues into the postoperative care area, the design and functionality is the same as Centricity Perioperative Intraoperative documentation but is configured to meet the needs of PACU nursing documentation.

One of the primary benefits of Centricity Perioperative PACU is its ease of use. Components can be easily customized to match your workflow, with clinical scripts configured to help guide providers through each step of their patient's individual care plans. Within the clinical scripts are computed variables which automatically calculate values that are used frequently in the PACU – such as the Aldrete Score, Glasgow Coma Scale (GCS) as well as the Fast-Track Discharge Score. This flexibility not only minimizes the time required to learn the system, it also speeds adoption among clinicians.

PACU DOCUMENTATION CAN HELP YOUR FACILITY

- Provide more predictable patient care
- Enhance efficiency with quick touch-screen data entry
- Streamline recovery workflow
- Vary content by patient population and Phase of Care
- Automate data capture from clinical devices
- Integrate with Anesthesia Intraoperative Record for seamless monitoring of the patient
- Augment communication with automated handoff summary of Anesthesia Intraoperative events.
