 the Science Laboratory Dimitris Psillos,H. Niedderer,2006-05-05 Scope of the book There is an on going debate regarding
 the role of labwork in science education which dates back several decades and which illustrates the conviction and interest of
 teachers researchers and policy makers world wide in the value of laboratory work for understanding science This is evident
 in more recent books and studies regarding the laboratory which mainly refer to countries with a considerable tradition in
 practical work in science education Woolnough Alsop 1985 Hodson 1993 Hegarthy Hazel 1990 Wellington 2000 Yet in
 discussing research studies on labwork several authors express their concern about its effectiveness in facilitating students
 understanding of various aspects of scientific inquiry They point out a comprehensive re conceptualisation of the aims of
 labwork and as a consequence of investigating what the students actually learn in different contexts Lazarowitz Tamir 1994

Tobin Tippins 1993 Lunetta 1998 It has also been argued that the relationship between instructional activities and student learning in labwork needs more attention than it has been given in science education research Leach Paulsen 1999 It appears that the case for research based labwork emerges in several quarters in science education particularly among researchers This book presents and discusses a variety of laboratory practices and their effectiveness The studies take into account recent theoretical developments and empirical results concerning students understanding of scientific inquiry A whole chapter is devoted to technological advances offering new learning opportunities for the students and teaching facilities for the teacher
